FORWARD-LOOKING STATEMENTS

The discussions of Trio-Tech International's (the "Company") business and activities set forth in this Form 10-Q and in other past and future reports and announcements by the Company may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and assumptions regarding future activities and results of operations of the Company. In light of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, the following factors, among others, could cause actual results to differ materially from those reflected in any forward-looking statements made by or on behalf of the Company: market acceptance of Company products and services; changing business conditions or technologies and volatility in the semiconductor industry, which could affect demand for the Company's products and services; the impact of competition; problems with technology; product development schedules; delivery schedules; changes in military or commercial testing specifications which could affect the market for the Company's products and services; difficulties in profitably integrating acquired businesses, if any, into the Company; risks associated with conducting business internationally and especially in Asia, including currency fluctuations and devaluation, currency restrictions, local laws and restrictions and possible social, political and economic instability; changes in U.S. and global financial and equity markets, including market disruptions and significant interest rate fluctuations; public health issues related to the COVID-19 pandemic; the trade tension between U.S. and China; and other economic, financial and regulatory factors beyond the Company's control. Other than statements of historical fact, all statements made in this Quarterly Report are forward-looking, including, but not limited to, statements regarding industry prospects, future results of operations or financial position, and statements of our intent, belief and current expectations about our strategic direction, prospective and future financial results and condition. In some cases, you can identify forward-looking statements by the use of terminology such as "may," "will," "expects," "plans," "anticipates," "estimates," "potential," "believes," "can impact," "continue," or the negative thereof or other comparable terminology. Forward-looking statements involve risks and uncertainties that are inherently difficult to predict, which could cause actual outcomes and results to differ materially from our expectations, forecasts and assumptions.

Unless otherwise required by law, we undertake no obligation to update forward-looking statements to reflect subsequent events, changed circumstances, or the occurrence of unanticipated events. You are cautioned not to place undue reliance on such forward-looking statements.

See notes to condensed consolidated financial statements.

Amounts included in restricted deposits represent the amount of cash pledged to secure loans payable or trade financing granted by financial institutions and serve as collateral for public utility agreements such as electricity and water. Restricted deposits are classified as noncurrent assets as they relate to long-term obligations and will become unrestricted only upon discharge of the obligations.

TRIO-TECH INTERNATIONAL AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (IN THOUSANDS, EXCEPT EARNINGS PER SHARE AND NUMBER OF SHARES)

1. ORGANIZATION AND BASIS OF PRESENTATION

Trio-Tech International (“the Company” or “TTI” hereafter) was incorporated in fiscal year 1958 under the laws of the State of California. TTI provides third-party semiconductor testing and burn-in services primarily through its laboratories in Southeast Asia. In addition, TTI operates testing facilities in the United States. The Company also designs, develops, manufactures and markets a broad range of equipment and systems used in the manufacturing and testing of semiconductor devices and electronic components. In the first quarter of fiscal year 2022, TTI conducted business in four business segments: Manufacturing, Testing Services, Distribution and Real Estate. TTI has subsidiaries in the U.S., Singapore, Malaysia, Thailand, Indonesia and China as follows:

	Ownership	Location
Express Test Corporation (Dormant)	100%	Van Nuys, California
Trio-Tech Reliability Services (Dormant)	100%	Van Nuys, California
KTS Incorporated, dba Universal Systems (Dormant)	100%	Van Nuys, California
European Electronic Test Centre (Dormant)	100%	Dublin, Ireland
Trio-Tech International Pte. Ltd.	100%	Singapore

Trio-Tech (Tianjin) Co., Ltd. *	100%	Tianjin, China

* 100% owned by Trio-Tech International Pte. Ltd.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with United States Generally Accepted Accounting Principles (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. All significant intercompany accounts and transactions have been eliminated in consolidation. The unaudited condensed consolidated financial statements are presented in U.S. dollars. The accompanying condensed consolidated financial statements do not include all the information and footnotes required by GAAP for complete financial statements. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company’s annual report for the fiscal year ended June 30, 2021. The Company’s operating results are presented based on the translation of foreign currencies using the respective quarter’s average exchange rate.

Certain accounting matters that generally require consideration of forecasted financial information were assessed regarding impacts from the COVID-19 pandemic as of September 30, 2021 and through the Quarterly Report dated November 15, 2021 using reasonably available information as of those dates. Those accounting matters assessed included, but were not limited to, allowance for doubtful accounts, the carrying value of long-lived tangible assets and the valuation allowances for tax assets. While the assessments resulted in no material impacts to the consolidated financial statements as of and for the quarter ended September 30, 2021, the Company believes the full impact of the pandemic remains uncertain and the Company will continue to assess if ongoing developments related to the pandemic may cause future material impacts to our consolidated financial statements. As of September 30, 2021, the Company had cash and cash equivalents and short-term deposits totaling \$11,098 and unused lines of credit of \$5,397. We finance operations primarily through our existing cash balances, cash collected from operations, bank borrowings and capital lease financing. We believe these sources are sufficient to fund our operations for the foreseeable future. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company’s annual report for the fiscal year ended June 30, 2021.

Basis of Presentation and Summary of Significant Accounting Policies

The Company's core businesses — testing services, manufacturing and distribution — operate in a volatile industry, whereby its average selling prices and product costs are influenced by competitive factors. These factors create pressures on sales, costs, earnings and cash flows, which will impact liquidity.

All dollar amounts in the consolidated financial statements and in the notes herein are presented in thousands of United States dollars (US\$'000) unless otherwise designated.

Liquidity — The Company earned net income attributable to common shareholders of \$917 and incurred net loss attributable to common shareholders of \$8 for the 3 months ended September 30, 2021, and September 30, 2020, respectively.

Foreign Currency Translation and Transactions — The U.S. dollar is the functional currency of the U.S. parent company. The Singapore dollar, the national currency of Singapore, is the primary currency of the economic environment in which the operations in Singapore are conducted. The Company also has business entities in Malaysia, Thailand, China and Indonesia of which the Malaysian ringgit ("RM"), Thai baht, Chinese renminbi ("RMB") and Indonesian rupiah, are the national currencies. The Company uses the U.S. dollar for financial reporting purposes.

The Company translates assets and liabilities of its subsidiaries outside the U.S. into U.S. dollars using the rate of exchange prevailing at the fiscal year end, and the consolidated statements of operations and comprehensive income or loss is translated at average rates during the reporting period. Adjustments resulting from the translation of the subsidiaries' financial statements from foreign currencies into U.S. dollars are recorded in shareholders' equity as part of accumulated other comprehensive gain - translation adjustments. Gains or losses resulting from transactions denominated in currencies other than functional currencies of the Company's subsidiaries are reflected in income for the reporting period.

Use of Estimates — The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Among the more significant estimates included in these consolidated financial statements are the estimated allowance for doubtful account receivables, reserve for obsolete inventory, reserve for warranty, impairments and the deferred income tax asset allowance. Actual results could materially differ from those estimates.

Revenue Recognition — The Company follows ASU No. 2014-09, ASC Topic 606, *Revenue from Contracts with Customers* ("ASC Topic 606"). This standard update outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers.

We apply a five-step approach as defined in ASC Topic 606 in determining the amount and timing of revenue to be recognized: (1) identifying the contract with customer; (2) identifying the performance obligations in the contracts; (3) determining the transaction price; (4) allocating the transaction price to the performance obligations in the contract; and (5) recognizing revenue when the corresponding performance obligation is satisfied.

Revenue derived from testing services is recognized when testing services are rendered. Revenue generated from sale of products in the manufacturing and distribution segments are recognized when persuasive evidence of an arrangement exists, delivery of the products has occurred, customer acceptance has been obtained (which means the significant risks and rewards of ownership have been transferred to the customer), the price is fixed or determinable and collectability is reasonably assured. Certain customers can request for installation and training services to be performed for certain products sold in the manufacturing segment. These services are mainly for helping customers with the test runs of the machines sold and are considered a separate performance obligation. Such services can be provided by other entities as well and these do not significantly modify the product. The Company recognizes the revenue at a point in time when the Company has satisfied its performance obligation.

In the real estate segment: (1) revenue from property development is earned and recognized on the earlier of the dates when the underlying property is sold or upon the maturity of the agreement; if this amount is uncollectible, the agreement empowers the repossession of the property, and (2) rental revenue is recognized on a straight-line basis over the terms of the respective leases. This means that, with respect to a particular lease, actual amounts billed in accordance with the lease during any given period may be higher or lower than the amount of rental revenue recognized for the period. Straight-line rental revenue is commenced when the tenant assumes possession of the leased premises. Accrued straight-line rents receivable represents the amount by which straight-line rental revenue exceeds rents currently billed in accordance with lease agreements.

GST / Indirect Taxes — The Company's policy is to present taxes collected from customers and remitted to governmental authorities on a net basis. The Company records the amounts collected as a current liability and relieves such liability upon remittance to the taxing authority without impacting revenues or expenses.

Trade Account Receivables and Allowance for Doubtful Accounts — During the normal course of business, the Company extends unsecured credit to its customers in all segments. Typically, credit terms require payment to be made between 30 to 90 days from the date of the sale. The Company generally does not require collateral from our customers.

The Company's management considers the following factors when determining the collectability of specific customer accounts: customer creditworthiness, past transaction history with the customer, current economic industry trends, and changes in customer payment terms. The Company includes any account balances that are determined to be uncollectible, along with a general reserve, in the overall allowance for doubtful accounts. After all attempts to collect a receivable have failed, the receivable is written off against the allowance. Based on the information available to management, the Company believed that its allowance for doubtful accounts was adequate as of September 30, 2021, and June 30, 2021.

Warranty Costs — The Company provides for the estimated costs that may be incurred under its warranty program at the time the sale is recorded in its manufacturing segment. The Company estimates warranty costs based on the historical rates of warranty returns. The Company periodically assesses the adequacy of its recorded warranty liability and adjusts the amounts as necessary.

Cash and Cash Equivalents — The Company considers all highly liquid investments with an original maturity of three months or less when purchased to be cash equivalents.

Term Deposits — Term deposits consist of bank balances and interest-bearing deposits having maturities of 3 to 6 months.

Restricted Term Deposits — The Company held certain term deposits in the Singapore and Malaysia operations which were considered restricted, as they were held as security against certain facilities granted by the financial institutions

Inventories — Inventories in the Company's manufacturing and distribution segments, consisting principally of raw materials, works in progress, and finished goods, are stated at the lower of cost, using the first-in, first-out ("FIFO") method, or market value. The semiconductor industry is characterized by rapid technological change, short-term customer commitments and rapid fluctuations in demand. Provisions for estimated excess and obsolete inventory are based on our regular reviews of inventory quantities on hand and the latest forecasts of product demand and production requirements from our customers. Inventories are written down for not-saleable, excess or obsolete raw materials, works-in-process and finished goods by charging such write-downs to cost of sales. In addition to write-downs based on newly introduced parts, statistics and judgments are used for assessing provisions of the remaining inventory based on salability and obsolescence.

Property, Plant and Equipment and Investment Properties — Property, plant and equipment and investment properties are stated at cost, less accumulated depreciation and amortization. Depreciation is provided for over the estimated useful lives of the assets using the straight-line method. Amortization of leasehold improvements is provided for over the lease terms or the estimated useful lives of the assets, whichever is shorter, using the straight-line method.

Maintenance, repairs and minor renewals are charged directly to expense as incurred. Additions and improvements to the assets are capitalized. When assets are disposed of, the related cost and accumulated depreciation thereon are removed from the accounts and any resulting gain or loss is included in the consolidated statements of operations and comprehensive income or loss.

Long-Lived Assets and Impairment — The Company's business requires heavy investment in manufacturing facilities and equipment that are technologically advanced but can quickly become significantly underutilized or rendered obsolete by rapid changes in demand.

The Company evaluates the long-lived assets, including property, plant and equipment and investment property, for impairment whenever events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. Factors considered important that could result in an impairment review include significant underperformance relative to expected historical or projected future operating results, significant changes in the manner of use of the assets or the strategy for our business, significant negative industry or economic trends, and a significant decline in the stock price for a sustained period of time. Impairment is recognized based on the difference between the fair value of the asset and its carrying value, and fair value is generally measured based on discounted cash flow analysis if there is significant adverse change.

The Company applies the provisions of ASC Topic 360, *Accounting for the Impairment or Disposal of Long-Lived Assets* ("ASC Topic 360"), to property, plant and equipment. ASC Topic 360 requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable through the estimated undiscounted cash flows expected to result from the use and eventual disposition of the assets. Whenever any such impairment exists, an impairment loss will be recognized for the amount by which the carrying value exceeds the fair value.

Leases - Company as Lessee

Accounting Standards Codification Topic 842 ("ASC Topic 842") introduced new requirements to increase transparency and comparability among organizations for leasing transactions for both lessees and lessors. It requires a lessee to record a right-of-use asset and a lease liability for all leases with terms longer than 12 months. These leases will be either finance or operating, with classification affecting the pattern of expense recognition.

The Company applies the guidance in ASC Topic 842 to its individual leases of assets. When the Company receives substantially all the economic benefits from and directs the use of specified property, plant and equipment, the transactions give rise to leases. The Company's classes of assets include real estate leases.

Operating leases are included in operating lease right-of-use ("ROU") assets under the noncurrent asset portion of our consolidated balance sheets and under the current portion and noncurrent liabilities portion of our consolidated balance sheets. ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the related lease. Finance leases are included in property, plant and equipment under the noncurrent asset portion of our consolidated balance sheets and under the current portion and noncurrent liabilities portion of our consolidated balance sheets.

The Company has elected the practical expedient within ASC Topic 842 to not separate lease and non-lease components within lease transactions for all classes of assets. Additionally, the Company has elected the short-term lease exception for all classes of assets, does not apply the recognition requirements for leases of 12 months or less, and recognizes lease payments for short-term leases as expense either straight-line over the lease term or as incurred depending on whether the lease payments are fixed or variable. These elections are applied consistently for all leases.

As part of applying the transition method, the Company has elected to apply the package of transition practical expedients within the new guidance. As required by the new standard, these expedients have been elected as a package and are consistently applied across the Company's lease portfolio. Given this election, the Company need not reassess:

- whether any expired or existing contracts are or contain leases;
- the lease classification for any expired or existing leases;
- treatment of initial direct costs relating to any existing leases.

When discount rates implicit in leases cannot be readily determined, the Company uses the applicable incremental borrowing rate at lease commencement to perform lease classification tests on lease components and to measure lease liabilities and ROU assets. The incremental borrowing rate used by the Company was based on baseline rates and adjusted by the credit spreads commensurate with the Company's secured borrowing rate over a similar term. At each reporting period when there is a new lease initiated, the rates established for that quarter will be used.

Leases - Company as Lessor

All the leases under which the Company is the lessor will continue to be classified as operating leases and sales-type lease under the new standard. The new standard did not have a material effect on our consolidated financial statements and will not have a significant change in our leasing activities.

Comprehensive Income or Loss — ASC Topic 220, *Reporting Comprehensive Income*, ("ASC Topic 220"), establishes standards for reporting and presentation of comprehensive income or loss and its components in a full set of general-purpose consolidated financial statements. The Company has chosen to report comprehensive income or loss in the statements of operations. Comprehensive income or loss is comprised of net income or loss and all changes to shareholders' equity except those due to investments by owners and distributions to owners.

Income Taxes — The Company accounts for income taxes using the liability method in accordance with ASC Topic 740, *Accounting for Income Taxes* ("ASC Topic 740"). ASC Topic 740 requires an entity to recognize deferred tax liabilities and assets. Deferred tax assets and liabilities are recognized for the future tax consequence attributable to the difference between the tax bases of assets and liabilities and their reported amounts in the consolidated financial statements, which will result in taxable or deductible amounts in future years. Further, the effects of enacted tax laws or rate changes are included as part of deferred tax expenses or benefits in the period that covers the enactment date.

The calculation of tax liabilities involves dealing with uncertainties in the application of complex global tax regulations. The Company recognizes potential liabilities for anticipated tax audit issues in the U.S. and other tax jurisdictions based on its estimate of whether, and the extent to which, additional taxes will be due. If payment of these amounts ultimately proves to be unnecessary, the reversal of the liabilities would result in tax benefits being recognized in the period when the Company determines the liabilities are no longer necessary. If the estimate of tax liabilities proves to be less than the ultimate assessment, a further charge to expense would result.

Retained Earnings — It is the intention of the Company to reinvest earnings of its foreign subsidiaries in the operations of those subsidiaries. These taxes are undeterminable at this time. The amount of earnings retained in subsidiaries was \$16,319 and \$16,683 at September 30, 2021, and June 30, 2021 respectively.

Stock-based compensation — The Company calculates compensation expense related to stock option awards made to employees and directors based on the fair value of stock-based awards on the date of grant. The Company determines the grant date fair value of our stock option awards using the Black-Scholes option pricing model and for awards without performance conditions, the related stock-based compensation is recognized over the period in which a participant is required to provide service in exchange for the stock-based award, which is generally four years. The Company recognizes stock-based compensation expense in the consolidated statements of shareholders' equity based on awards ultimately expected to vest. Forfeitures are estimated on the date of grant and revised if actual or expected forfeiture activity differs materially from original estimates.

Determining the fair value of stock-based awards at the grant date requires significant judgment. The determination of the grant date fair value of stock-based awards using the Black-Scholes option pricing model is affected by our estimated common stock fair value as well as other subjective assumptions including the expected term of the awards, the expected volatility over the expected term of the awards, expected dividend yield and risk-free interest rates. The assumptions used in our option pricing model represent management's best estimates and are as follows:

- Fair Value of Common Stock. We determined the fair value of each share of underlying common stock based on the closing price of our common stock on the date of grant.
- Expected Term. The expected term of employee stock options reflects the period for which we believe the option will remain outstanding based on historical experience and future expectations.
- Expected Volatility. We base expected volatility on our historical information over a similar expected term.

Earnings per Share — Computation of basic earnings per share is conducted by dividing net income available to common shares (numerator) by the weighted average number of common shares outstanding (denominator) during a reporting period. Computation of diluted earnings per share gives effect to all dilutive potential common shares outstanding during a reporting period. In computing diluted earnings per share, the average market price of common shares for a reporting period is used in determining the number of shares assumed to be purchased from the exercise of stock options.

Fair Values of Financial Instruments — Carrying values of trade account receivables, accounts payable, accrued expenses, and term deposits approximate their fair value due to their short-term maturities. Carrying values of the Company's lines of credit and long-term debt are considered to approximate their fair value because the interest rates associated with the lines of credit and long-term debt are adjustable in accordance with market situations when the Company tries to borrow funds with similar terms and remaining maturities. See Note 16 for detailed discussion of the fair value measurement of financial instruments.

ASC Topic 820, Fair Value Measurements and Disclosures ("ASC Topic 820") defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The financial assets and financial liabilities that require recognition under the guidance include available-for-sale investments, employee deferred compensation plan and foreign currency derivatives. The guidance establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of us. Unobservable inputs are inputs that reflect our assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available under the circumstances. As such, fair value is a market-based measure considered from the perspective of a market participant who holds the asset or owes the liability rather than an entity-specific measure. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

- Level 1—Valuations based on quoted prices in active markets for identical assets or liabilities that we have the ability to access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail a significant degree of judgment. Financial assets utilizing Level 1 inputs include U.S. treasuries, most money market funds, marketable equity securities and our employee deferred compensation plan;
- Level 2—Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, directly or indirectly. Financial assets and liabilities utilizing Level 2 inputs include foreign currency forward exchange contracts, most commercial paper and corporate notes and bonds; and
- Level 3—Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

Concentration of Credit Risk — Financial instruments that subject the Company to credit risk compose trade account receivables. The Company performs ongoing credit evaluations of its customers for potential credit losses. The Company generally does not require collateral. The Company believes that its credit policies do not result in significant adverse risk and historically it has not experienced significant credit related losses.

Investments — The Company (a) evaluates the sufficiency of the total equity at risk, (b) reviews the voting rights and decision-making authority of the equity investment holders as a group, and whether there are any guaranteed returns, protection against losses, or capping of residual returns within the group, and (c) establishes whether activities within the venture are on behalf of an investor with disproportionately few voting rights in making this Variable Interest Entity (“VIE”) determination. The Company would consolidate an investment that is determined to be a VIE if it was the primary beneficiary. The primary beneficiary of a VIE is determined by a primarily qualitative approach, whereby the variable interest holder, if any, has the power to direct the VIE’s most significant activities and is the primary beneficiary. A new accounting standard became effective and changed the method by which the primary beneficiary of a VIE is determined. Through a primarily qualitative approach, the variable interest holder who has the power to direct the VIE’s most significant activities is determined to be the primary beneficiary. To the extent that the investment does not qualify as VIE, the Company further assesses the existence of a controlling financial interest under a voting interest model to determine whether the investment should be consolidated.

Equity Method — The Company analyzes its investments to determine if they should be accounted for using the equity method. Management evaluates both Common Stock and in-substance Common Stock to determine whether they give the Company the ability to exercise significant influence over operating and financial policies of the investment even though the Company holds less than 50% of the Common Stock and in-substance Common Stock. The net income of the investment, if any, will be reported as “Equity in earnings of unconsolidated joint ventures, net of tax” in the Company’s consolidated statements of operations and comprehensive income.

Cost Method — Investee companies not accounted for under the consolidation or the equity method of accounting are accounted for under the cost method of accounting. Under this method, the Company’s share of the earnings or losses of such investee companies is not included in the consolidated balance sheet or statements of operations and comprehensive income or loss. However, impairment charges are recognized in the consolidated statements of operations and comprehensive income or loss. If circumstances suggest that the value of the investee company has subsequently recovered, such recovery is not recorded.

Loan Receivables from Property Development Projects — The loan receivables from property development projects are classified as current assets, carried at face value, and are individually evaluated for impairment. The allowance for loan losses reflects management’s best estimate of probable losses determined principally on the basis of historical experience and specific allowances for known loan accounts. All loans or portions thereof deemed to be uncollectible or to require an excessive collection cost are written off to the allowance for losses.

Interest income on the loan receivables from property development projects are recognized on an accrual basis. Discounts and premiums on loans are amortized to income using the interest method over the remaining period to contractual maturity. The amortization of discounts into income is discontinued on loans that are contractually 90 days past due or when collection of interest appears doubtful.

Contingent Liabilities — Certain conditions may exist as of the date the consolidated financial statements are issued, which may result in a loss to the Company, but which will only be resolved when one or more future events occur or fail to occur. The Company’s management and its legal counsel assess such contingent liabilities, and such assessment inherently involves an exercise of judgment. In assessing loss contingencies related to legal proceedings that are pending against the Company or unasserted claims that may result in such proceedings, the Company’s legal counsel evaluates the perceived merits of any legal proceedings or unasserted claims, as well as the perceived merits of the amount of relief sought or expected to be sought therein.

If the assessment of a contingency indicates that it is probable that a material loss has been incurred and the amount of the liability can be estimated, then the estimated liability would be accrued in the Company’s consolidated financial statements. If the assessment indicates that a potential material loss contingency is not probable, but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability, together with an estimate of the range of possible loss if determinable and material, would be disclosed.

Loss contingencies considered remote are generally not disclosed unless they involve guarantees, in which case the nature of the guarantee would be disclosed.

2. NEW ACCOUNTING PRONOUNCEMENTS

In March 2020, FASB issued ASU 2020-04 ASC Topic 848: *Reference Rate Reform: Facilitation of the Effects of Reference Rate Reform on Financial Reporting*, which provides optional expedients and exceptions for applying U.S. GAAP to contracts, hedging relationships and other transactions affected by the discontinuation of the London Interbank Offered Rate (“LIBOR”) or by another reference rate expected to be discontinued. The amendments are effective for all entities as of March 12, 2020, and the Company may elect to apply the amendments prospectively through December 31, 2022. The Company has completed its assessment and concluded that this update has no significant impact to the Company’s consolidated financial statements.

In June 2016, FASB issued ASU 2016-13 ASC Topic 326: *Financial Instruments — Credit Losses* (“ASC Topic 326”) for the measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. Financial institutions and other organizations will now use forward-looking information to better inform their credit loss estimates. Many of the loss estimation techniques applied today will still be permitted, although the inputs to those techniques will change to reflect the full amount of expected credit losses. ASC Topic 326 is effective for the Company for annual periods beginning after December 15, 2022. The Company has completed its assessment and concluded that this update has no significant impact to the Company’s consolidated financial statements.

Other new pronouncements issued but not yet effective until after September 30, 2021, are not expected to have a significant effect on the Company’s consolidated financial position or results of operations.

3. TERM DEPOSITS

	Sep. 30, 2021 (Unaudited)	June 30, 2021
Short-term deposits	\$ 5,997	\$ 6,353
Currency translation effect on short-term deposits	(72)	298
Total short-term deposits	5,925	6,651
Restricted term deposits	1,743	1,682
Currency translation effect on restricted term deposits	(21)	59
Total restricted term deposits	1,722	1,741
Total term deposits	\$ 7,647	\$ 8,392

Restricted deposits represent the amount of cash pledged to secure loans payable to financial institutions and serve as collateral for public utility agreements such as electricity and water, and performance bonds related to customs duty payable. Restricted deposits are classified as noncurrent assets, as they relate to long-term obligations and will become unrestricted only upon discharge of the obligations. Short-term deposits represent bank deposits, which do not qualify as cash equivalents.

4. TRADE ACCOUNTS RECEIVABLE AND ALLOWANCE FOR DOUBTFUL ACCOUNTS

Accounts receivable are customer obligations due under normal trade terms. The Company performs continuing credit evaluations of its customers' financial conditions, and although management generally does not require collateral, letters of credit may be required from the customers in certain circumstances.

Senior management reviews accounts receivable on a periodic basis to determine if any receivables will potentially be uncollectible. Management includes any accounts receivable balances that are determined to be uncollectible in the allowance for doubtful accounts. After all reasonable attempts to collect a receivable have failed, the receivable is written off against the allowance. Based on the information available, management believed the allowance for doubtful accounts as of September 30, 2021, and June 30, 2021, was adequate.

The following table represents the changes in the allowance for doubtful accounts:

	Sept. 30, 2021 (Unaudited)	June 30, 2021
Beginning	\$ 311	\$ 314
Additions charged to expenses	-	5
Recovered	(2)	(14)
Write-off	-	(16)
Currency translation effect	(1)	22
Ending	\$ 308	\$ 311

5. LOANS RECEIVABLE FROM PROPERTY DEVELOPMENT PROJECTS

The following table presents Trio-Tech (Chongqing) Co. Ltd.'s ("TTCQ")'s loan receivables from property development projects in China as of September 30, 2021.

	Loan Expiry Date	Loan Amount (RMB)	Loan Amount (U.S. Dollars)
Short-term loan receivables			
JiangHuai (Project – Yu Jin Jiang An)	May 31, 2013	2,000	309
Less: allowance for doubtful receivables		(2,000)	(309)
Net loan receivables from property development projects		-	-
Long-term loan receivables			
Jun Zhou Zhi Ye	Oct 31, 2016	5,000	773
Less: transfer – down-payment for purchase of investment property		(5,000)	(773)
Net loan receivables from property development projects		-	-

The short-term loan receivables amounting to renminbi ("RMB") 2,000, or approximately \$309, arose due to TTCQ entering into a Memorandum Agreement with JiangHuai Property Development Co. Ltd. ("JiangHuai") to invest in their property development projects (Project - Yu Jin Jiang An) located in Chongqing City, China, in fiscal 2011. Based on TTI's financial policy, a provision for doubtful receivables of \$309 on the investment in JiangHuai was recorded during fiscal 2014. TTCQ did not generate other income from JiangHuai for the quarter ended September 30, 2021, or for the fiscal year ended June 30, 2021. TTCQ is in the legal process of recovering the outstanding amount of \$309.

The loan amounting to RMB5,000, or approximately \$773 arose due to TTCQ entering into a Memorandum Agreement with JiaSheng Property Development Co. Ltd. ("JiaSheng") to invest in their property development projects (Project B-48 Phase 2) located in Chongqing City, China, in fiscal 2011. The amount was unsecured and repayable at the end of the term. The book value of the loan receivable approximates its fair value. During fiscal year 2015, the loan receivable was transferred to down payment for purchase of investment property that is being developed in the Singapore Themed Resort Project (See Note 8).

6. INVENTORIES

Inventories consisted of the following:

	Sept. 30, 2021 (Unaudited)	June 30, 2021
Raw materials	\$ 1,436	\$ 1,152
Work in progress	1,436	1,218
Finished goods	250	325
Less: provision for obsolete inventories	(685)	(679)
Currency translation effect	(27)	64
	\$ 2,410	\$ 2,080

The following table represents the changes in provision for obsolete inventories:

	Sept. 30, 2021 (Unaudited)	June 30, 2021
Beginning	\$ 679	\$ 678
Additions charged to expenses	11	13
Usage – disposition	-	(28)
Currency translation effect	(5)	16
Ending	\$ 685	\$ 679

7. INVESTMENT PROPERTIES

The following table presents the Company's investment in properties in China as of September 30, 2021. The exchange rate is based on the market rate as of September 30, 2021.

	Investment Date / Reclassification Date	Investment Amount (RMB)	Investment Amount (U.S. Dollars)
Purchase of rental property – Property I – MaoYe Property	Jan 04, 2008	5,554	894
Currency translation		-	(87)
Reclassification as “Assets held for sale”	July 01, 2019	(5,554)	(807)
Reclassification from “Assets held for sale”	Mar 31, 2020	2,024	301
		2,024	301
Purchase of rental property – Property II - JiangHuai	Jan 06, 2010	3,600	580
Purchase of rental property – Property III - FuLi	Apr 08, 2010	4,025	648
Currency translation		-	(38)
Gross investment in rental property		9,649	1,491
Accumulated depreciation on rental property	Sep 30, 2021	(7,161)	(1,097)
Reclassified as “Assets held for sale” - MaoYe Property	July 01, 2019	2,822	410
Reclassification from “Assets held for sale” - MaoYe Property	Mar 31, 2020	(1,029)	(143)
		(5,368)	(830)
Net investment in properties – China		4,281	661

The following table presents the Company's investment in properties in China as of June 30, 2021. The exchange rate is based on the market rate as of June 30, 2021.

	Investment Date / Reclassification Date	Investment Amount (RMB)	Investment Amount (U.S. Dollars)
Purchase of rental property – Property I – MaoYe Property	Jan 04, 2008	5,554	894
Currency translation		-	(87)
Reclassification as “Assets held for sale”	Jul 01, 2018	(5,554)	(807)
Reclassification from “Assets held for sale”	Mar 31, 2019	2,024	301
		2,024	301
Purchase of rental property – Property II - JiangHuai	Jan 06, 2010	3,600	580
Purchase of rental property – Property III - FuLi	Apr 08, 2010	4,025	648
Currency translation		-	(36)
Gross investment in rental property		9,649	1,493
Accumulated depreciation on rental property	Jun 30, 2021	(7,040)	(1,079)
Reclassified as “Assets held for sale” - Mao Ye Property	Jul 01, 2019	2,822	410
Reclassification from “Assets held for sale” - Mao Ye Property	Mar 31, 2020	(1,029)	(143)
		(5,247)	(812)
Net investment in properties – China		4,402	681

Rental Property I - MaoYe Property

In fiscal 2008, TTCQ purchased an office in Chongqing, China from MaoYe Property Ltd. (“MaoYe”), for a total cash purchase price of RMB5,554, or approximately \$894.

TTCQ signed a new lease agreement to rent out the 403 square meter space at a monthly rate of RMB14, or approximately \$2, from September 1, 2021 to February 28, 2022.

Property purchased from MaoYe generated a rental income of \$2 during the three months ended September 30, 2021, as compared to \$nil for the same period in last fiscal year.

Depreciation expense for MaoYe was \$4 for the three months ended September 30, 2021 and 2020, respectively.

Rental Property II - JiangHuai

In fiscal year 2010, TTCQ purchased eight units of commercial property in Chongqing, China from Chongqing JiangHuai Real Estate Development Co. Ltd. (“JiangHuai”) for a total purchase price of RMB3,600, or approximately \$580. TTCQ had yet to receive the title deed for these properties. TTCQ was in the legal process of obtaining the title deed until the developer encountered cash flow difficulties in the recent years. Since then, JiangHuai has been under liquidation and is now undergoing asset distribution. Nonetheless, this is not expected to affect the property's market value but, in view of the COVID-19 pandemic and current economic situation, it is likely to be more tedious and time-consuming for the court in their execution of the sale.

Property purchased from JiangHuai did not generate any rental income for the three months ended September 30, 2021 and 2020.

Depreciation expense for JiangHuai was \$7 and \$6 for the three months ended September 30, 2021 and 2020, respectively.

Rental Property III – FuLi

In fiscal 2010, TTCQ entered into a Memorandum Agreement with Chongqing FuLi Real Estate Development Co. Ltd. (“FuLi”) to purchase two commercial properties totaling 311.99 square meters (“office space”) located in Jiang Bei District Chongqing. The total purchase price committed and paid was RMB 4,025, or approximately \$622. The development was completed, the property was handed over to TTCQ in April 2013 and the title deed was received during the third quarter of fiscal 2014.

One of the two commercial properties was leased from TTCQ by a third party under a two-year lease to rent out the 154.49 square meter space at a monthly rate of RMB9, or approximately \$1, commencing from May 21, 2021, to May 23, 2023.

For the other leased property, TTCQ renewed the lease agreement to rent out the 161 square meter space at a monthly rate of RMB10, or approximately \$1, from November 1, 2019, to October 31, 2020. After which, TTCQ renewed the lease agreement at a monthly rate of RMB10, or approximately \$1, from November 1, 2020, to April 30, 2021, and May 1, 2021, to October 31, 2021.

Properties purchased from FuLi generated a rental income of \$9 for the three months ended September 30, 2021, and \$4 for the same period in the last fiscal year.

Depreciation expense for FuLi was \$8 and \$7 for the three months ended September 30, 2021 and 2020, respectively.

Summary

Total rental income for all investment properties in China was \$11 for the three months ended September 30, 2021, and \$4 for the same period in the last fiscal year.

Depreciation expenses for all investment properties in China were \$19 and \$17 for the three months ended September 30, 2021, and the same period in the last fiscal year, respectively.

8. OTHER ASSETS

Other assets consisted of the following:

	Sept. 30, 2021 (Unaudited)	June 30, 2021
Down payment for purchase of investment properties *	\$ -	\$ -
Down payment for purchase of property, plant and equipment	140	372
Deposits for rental and utilities	163	160
Asset in transit	12	-
Currency translation effect	(19)	(270)
Total	\$ 296	\$ 262

*Down payment for purchase of investment properties included:

	RMB	US Dollars
Original investment (10% of Jun Zhou equity)	\$ 10,000	\$ 1,606
Less: Management Fee	(5,000)	(803)
Net Investment	5,000	803
Less: Share of Loss on Joint Venture	(137)	(22)
Net Investment as Down Payment (Note *a)	4,863	781
Loans Receivable	5,000	773
Interest Receivable	1,250	193
Less: Impairment of Interest	(906)	(140)
Transferred to Down Payment (Note *b)	5,344	826
* Down Payment for purchase of investment properties	10,207	1,607
Less: Provision of Impairment loss on other assets	(10,207)	(1,607)
* Down Payment for Purchase of Investment Properties	-	-

- a) In fiscal year 2011, the Company signed a Joint Venture agreement (“agreement”) with Jia Sheng Property Development Co. Ltd. (“Developer”) to form a new company, Jun Zhou Co., Limited (“Joint Venture” or “Jun Zhou”) to joint develop the “Singapore Themed Park” project (the “project”), where the Company paid RMB10 million for the 10% investment in the joint venture. The Developer paid Company a management fee of RMB5 million in cash upon signing of the agreement with a remaining fee of RMB5 million payable upon fulfillment of certain conditions in accordance with the agreement. The Company further reduced its investment by RMB137, or approximately \$22 towards the losses from operations incurred by the joint venture.

In fiscal year 2014, the Company disposed its entire 10% interest in the joint venture. The Company recognized the disposal of its 10% investment in Jun Zhou based on the recorded net book value of RMB5 million, or equivalent to \$803, from net considerations paid, in accordance with US GAAP under ASC Topic 845 *Nonmonetary Consideration*, and it's presented under "Other Assets" as noncurrent assets to defer the recognition of the gain on the disposal of the 10% interest in the joint venture investment until such time that the consideration is paid, so that the gain can be ascertained.

- b) Amounts of RMB5,000 or approximately \$773 as disclosed in Note 5, plus the interest receivable on Long-term loan receivable of RMB1,250 or approximately \$193, and impairment on interest of RMB 906 or approximately \$140.

The shop lots are to be delivered to TTCQ upon completion of the construction of the shop lots in the Singapore Themed Resort Project. The initial targeted date of completion was in fiscal year 2017. Based on discussion with the developers, the completion date is currently estimated to be December 31, 2022. The delay was primarily due to the time needed by the developers to work with various parties to inject sufficient funds into this project, especially during the COVID-19 pandemic

During the fourth quarter of 2021, The Company accrued an impairment charge of \$1,580 related to the doubtful recovery of the down payment on shop lots in the Singapore Theme Resort Project in Chongqing, China, which the impairment loss translated based on the exchange rate used in the fiscal year 2021. The Company accounted for this non-cash impairment charge because of increased uncertainties regarding the project's viability given the developer's weakening financial condition as well as uncertainties arising from the negative real estate environment in China, implementation of control measures on real estate lending and its relevant government policies, together with effects of the ongoing pandemic.

9. LINES OF CREDIT

Carrying value of the Company's lines of credit approximates its fair value because the interest rates associated with the lines of credit are adjustable in accordance with market situations when the Company borrowed funds with similar terms and remaining maturities.

The Company's credit rating provides it with ready and adequate access to funds in global markets.

As of September 30, 2021, the Company had certain lines of credit that are collateralized by restricted deposits.

Entity with Facility	Type of Facility	Interest Rate	Expiration Date	Credit Limitation	Unused Credit
Trio-Tech International Pte. Ltd., Singapore	Lines of Credit	Ranging from 1.85% to 5.5%, SIBOR rate +1.2% and LIBOR rate +1.25%	-	\$ 4,187	\$ 4,187
Universal (Far East) Pte. Ltd.	Lines of Credit	Ranging from 1.85% to 5.5%	-	\$ 1,102	\$ 853
Trio-Tech Malaysia Sdn. Bhd.	Revolving Credit	Cost of Funds Rate +2%	-	\$ 357	\$ 357

As of June 30, 2021, the Company had certain lines of credit that are collateralized by restricted deposits.

Entity with Facility	Type of Facility	Interest Rate	Expiration Date	Credit Limitation	Unused Credit
Trio-Tech International Pte. Ltd., Singapore	Lines of Credit	Ranging from 1.85% to 5.5%, SIBOR rate +1.2% and LIBOR rate +1.25%	-	\$ 4,237	\$ 4,237
Universal (Far East) Pte. Ltd.	Lines of Credit	Ranging from 1.85% to 5.5%	-	\$ 1,115	\$ 1,043
Trio-Tech Malaysia Sdn. Bhd.	Revolving Credit	Cost of Funds Rate +2%	-	\$ 361	\$ 361

10. ACCRUED EXPENSES

Accrued expenses consisted of the following:

	Sept. 30, 2021 (Unaudited)	June 30, 2021
Payroll and related costs	\$ 1,560	\$ 1,362
Commissions	83	51
Customer deposits	44	45
Legal and audit	346	321
Sales tax	31	9
Utilities	92	91
Warranty	16	14
Accrued purchase of materials and property, plant and equipment	435	144
Provision for reinstatement	308	290
Deferred income	70	67
Contract liabilities	603	628
Other accrued expenses	318	279
Currency translation effect	(34)	62
Total	\$ 3,872	\$ 3,363

11. ASSURANCE WARRANTY ACCRUAL

The Company provides for the estimated costs that may be incurred under its warranty program at the time the sale is recorded. The warranty period of the products manufactured by the Company is generally one year or the warranty period agreed upon with the customer. The Company estimates the warranty costs based on the historical rates of warranty returns. The Company periodically assesses the adequacy of its recorded warranty liability and adjusts the amounts as necessary.

	Sept. 30, 2021 (Unaudited)	June 30, 2021
Beginning	\$ 14	\$ 12
Additions charged to cost and expenses	2	7
Reversal	-	(4)
Currency translation effect	-	(1)
Ending	\$ 16	\$ 14

12. BANK LOANS PAYABLE

Bank loans payable consisted of the following:

	Sept. 30, 2021 (Unaudited)	June 30, 2021
Note payable denominated in RM for expansion plans in Malaysia, maturing in August 2028, bearing interest at the bank's prime rate less 2.00% (3.60% at September 30, 2021, and June 30, 2021, respectively) per annum, with monthly payments of principal plus interest through August 2028, collateralized by the acquired building with a carrying value of \$2,590 and \$2,579, as at September 30, 2021, and June 30, 2021, respectively.	1,764	1,885
Financing arrangement at fixed interest rate 3.2% per annum, with monthly payments of principal plus interest through July 2025.	163	175
Total bank loans payable	\$ 1,927	\$ 2,060
Current portion of bank loans payable	444	428
Currency translation effect on current portion of bank loans	(6)	11
Current portion of bank loans payable	438	439
Long-term portion of bank loans payable	1,510	1,564
Currency translation effect on long-term portion of bank loans	(21)	57
Long-term portion of bank loans payable	\$ 1,489	\$ 1,621

Future minimum payments (excluding interest) as at September 30, 2021, were as follows:

Remainder of fiscal 2022	\$	438
2023		455
2024		391
2025		200
2026		167
Thereafter		276
Total obligations and commitments	\$	<u>1,927</u>

Future minimum payments (excluding interest) as at June 30, 2021, were as follows:

2022	\$	439
2023		457
2024		462
2025		208
2026		171
Thereafter		323
Total obligations and commitments	\$	<u>2,060</u>

13. COMMITMENTS AND CONTINGENCIES

Trio-Tech (Malaysia) Sdn. Bhd. has no capital commitments as at September 30, 2021, as compared to capital commitment of \$93 as at June 30, 2021.

Trio-Tech (SIP) Co., Ltd. in China has capital commitments for the purchase of equipment and other related infrastructure costs amounting to RMB5,799, or approximately \$1,378, as at September 30, 2021, as compared to no capital commitment as at June 30, 2021. These commitments arise due to a new project that is under negotiation between the long-term customer and Trio-Tech (SIP) Co., Ltd. As of the date of this report, the negotiation of the terms and conditions with the customer is still on-going.

Trio-Tech (Tianjin) Co., Ltd. in China has capital commitments for the purchase of equipment and other related infrastructure costs amounting to RMB284, or approximately \$68, as at September 30, 2021, as compared to no capital commitment as at June 30, 2021.

The Company is, from time to time, the subject of litigation claims and assessments arising out of matters occurring in its normal business operations. In the opinion of management, resolution of these matters will not have a material adverse effect on the Company's financial statements.

14. BUSINESS SEGMENTS

The Company generates revenue primarily from 3 different segments: Manufacturing, Testing and Distribution. The Company accounts for a contract with a customer when there is approval and commitment from both parties, the rights of the parties are identified, payment terms are identified, the contract has commercial substance and collectability of consideration is probable. The Company's revenues are measured based on consideration stipulated in the arrangement with each customer, net of any sales incentives and amounts collected on behalf of third parties, such as sales taxes. The revenues are recognized as separate performance obligations that are satisfied by transferring control of the product or service to the customer.

The revenue allocated to individual countries was based on where the customers were located. The allocation of the cost of equipment, the current year investment in new equipment and depreciation expense have been made based on the primary purpose for which the equipment was acquired.

Significant Judgments

The Company's arrangements with its customers include various combinations of products and services, which are generally capable of being distinct and accounted for as separate performance obligations. A product or service is considered distinct if it is separately identifiable from other deliverables in the arrangement and if a customer can benefit from it on its own or with other resources that are readily available to the customer.

The Company allocates the transaction price to each performance obligation on a relative stand-alone selling price basis (“SSP”). Determining the SSP for each distinct performance obligation and allocation of consideration from an arrangement to the individual performance obligations and the appropriate timing of revenue recognition are significant judgments with respect to these arrangements. The Company typically establishes the SSP based on observable prices of products or services sold separately in comparable circumstances to similar clients. The Company may estimate SSP by considering internal costs, profit objectives and pricing practices in certain circumstances.

Warranties, discounts and allowances are estimated using historical and recent data trends. The Company includes estimates in the transaction price only to the extent that a significant reversal of revenue is not probable in subsequent periods. The Company’s products and services are generally not sold with a right of return, nor has the Company experienced significant returns from or refunds to its customers.

Manufacturing

The Company primarily derives revenue from the sale of both front-end and back-end semiconductor test equipment and related peripherals, maintenance and support of all these products, installation and training services and the sale of spare parts. The Company’s revenues are measured based on consideration stipulated in the arrangement with each customer, net of any sales incentives and amounts collected on behalf of third parties, such as sales taxes.

The Company recognizes revenue at a point in time when the Company has satisfied its performance obligation by transferring control of the product to the customer. The Company uses judgment to evaluate whether the control has transferred by considering several indicators, including:

- whether the Company has a present right to payment;
- the customer has legal title;
- the customer has physical possession;
- the customer has significant risk and rewards of ownership; and
- the customer has accepted the product, or whether customer acceptance is considered a formality based on history of acceptance of similar products (for example, when the customer has previously accepted the same equipment, with the same specifications, and when we can objectively demonstrate that the tool meets all the required acceptance criteria, and when the installation of the system is deemed perfunctory).

Not all indicators need to be met for the Company to conclude that control has transferred to the customer. In circumstances in which revenue is recognized prior to the product acceptance, the portion of revenue associated with its performance obligations of product installation and training services are deferred and recognized upon acceptance.

The majority of sales under the Manufacturing segment include a standard 12-month warranty. The Company has concluded that the warranty provided for standard products are assurance type warranties and are not separate performance obligations. Warranty provided for customized products are service warranties and are separate performance obligations. Transaction prices are allocated to this performance obligation using cost plus method. The portion of revenue associated with warranty service is deferred and recognized as revenue over the warranty period, as the customer simultaneously receives and consumes the benefits of warranty services provided by the Company.

Testing

The Company renders testing services to manufacturers and purchasers of semiconductors and other entities who either lack testing capabilities or whose in-house screening facilities are insufficient. The Company primarily derives testing revenue from burn-in services, manpower supply and other associated services. SSP is directly observable from the sales orders. Revenue is allocated to performance obligations satisfied at a point in time depending upon terms of the sales order. Generally, there is no other performance obligation other than what has been stated inside the sales order for each of these sales.

Terms of contract that may indicate potential variable consideration include warranty, late delivery penalty and reimbursement to solve nonconformance issues for rejected products. Based on historical and recent data trends, it is concluded that these terms of the contract do not represent potential variable consideration. The transaction price is not contingent on the occurrence of any future event.

Distribution

The Company distributes complementary products, particularly equipment, industrial products and components by manufacturers mainly from the U.S., Europe, Taiwan and Japan. The Company recognizes revenue from product sales at a point in time when the Company has satisfied its performance obligation by transferring control of the product to the customer. The Company uses judgment to evaluate whether control has transferred by considering several indicators discussed above. The Company recognizes the revenue at a point in time, generally upon shipment or delivery of the products to the customer or distributors, depending upon terms of the sales order.

All intersegment revenue was from the manufacturing segment to the testing and distribution segments. Total intersegment revenue was \$92 for the three months ended September 30, 2021, as compared to \$381 for the same period in the last fiscal year. Corporate assets mainly consisted of cash and prepaid expenses. Corporate expenses mainly consisted of stock option expenses, salaries, insurance, professional expenses and directors' fees. Corporate expenses are allocated to the four segments. The following segment information table includes segment operating income or loss after including the corporate expenses allocated to the segments, which gets eliminated in the consolidation.

The following segment information is unaudited for the three months ended September 30, 2021, and September 30, 2020:

Business Segment Information:

	Three Months Ended Sept. 30,	Net Revenue	Operating Income / (Loss)	Total Assets	Depr. And Amort.	Capital Expenditures
Manufacturing	2021	\$ 3,562	300	18,558	103	60
	2020	\$ 2,625	(18)	10,383	106	67

	2020	4	(27)	3,722	17	-
Fabrication Services *	2021	-	-	-	-	-
	2020	-	-	25	-	-
Corporate & Unallocated	2021	-	(97)	314	-	-
	2020	-	(69)	92	-	-
Total Company	2021	\$ 10,171	970	40,111	709	438
	2020	\$ 6,841	(327)	35,828	702	87

* Fabrication services is a discontinued operation.

15. OTHER INCOME

Other income consisted of the following:

	Three Months Ended September 30,	
	2021	2020
Interest income	22	40
Other rental income	29	21
Exchange gain/(loss)	34	(44)
Bad debt recovery	2	5
Dividend income	-	2
Government grant	70	154
Other miscellaneous income	4	33
Total	\$ 161	\$ 211

During the first quarter of fiscal year 2022, the Company received government grants amounting to \$70, of which \$42 were the financial assistance received from the Malaysia and Thailand governments amid the COVID-19 pandemic.

During the first quarter of fiscal year 2021, the Company received government grants of \$154 from the local government in the Singapore and Malaysia operations, of which \$142 reflects financial assistance to mitigate the negative impact on the businesses amid the pandemic.

16. INCOME TAX

The Company is subject to income taxes in the U.S. and numerous foreign jurisdictions. Significant judgment is required in determining the provision for income taxes and income tax assets and liabilities, including evaluating uncertainties in the application of accounting principles and complex tax laws. The statute of limitations, in general, is open for years 2014 to 2020 for tax authorities in those jurisdictions to audit or examine income tax returns. The Company is under annual review by the tax authorities of the respective jurisdiction to which the subsidiaries belong.

The Tax Cuts and Jobs Act (the "Tax Act") was enacted in fiscal year 2018, and reduced the U.S. federal corporate tax rate from 35% to 21%, eliminated corporate Alternative Minimum Tax, modified rules for expensing capital investment, and limited the deduction of interest expense for certain companies. The Act is a fundamental change to the taxation of multinational companies, including a shift from a system of worldwide taxation with some deferral elements to a territorial system, current taxation of certain foreign income, a minimum tax on low tax foreign earnings, and new measures to curtail base erosion and promote U.S. production.

Due to the enactment of the Tax Act, the Company is subject to a tax on global intangible low-taxed income ("GILTI"). GILTI is a tax on foreign income in excess of a deemed return on tangible assets of foreign corporations. Companies subject to GILTI have the option to account for the GILTI tax as a period cost if and when incurred, or to recognize deferred taxes for temporary differences including outside basis differences expected to reverse as GILTI. The Company has elected to account for GILTI as a period cost. GILTI expense is \$23 and \$Nil for the period ended September 30, 2021 and September 30, 2020, respectively.

The Company's income tax expense was \$180 and \$7 for the three months ended September 30, 2021, and September 30, 2020, respectively. Our effective tax rate ("ETR") from continuing operations was 16% and 5% for the quarter ended September 30, 2021, and September 30, 2020, respectively. The increase in income tax expense and effective tax rate was due to the following:

1. The Singapore operations incurred higher income tax due to higher income generated in period ended September 30, 2021 compared to same period last fiscal year coupled with tax benefit, which was fully utilized in the last fiscal year.
2. The Thailand operation incurred higher income tax due to higher income generated in period ended September 30, 2021 compared to same period last fiscal year.
3. The Company recognized \$23 of GILTI tax expenses in period ended September 30, 2021 due to higher income derived from controlled foreign corporation.

The Company accrues penalties and interest related to unrecognized tax benefits when necessary as a component of penalties and interest expenses, respectively. The Company had no unrecognized tax benefits or related accrued penalties or interest expenses at September 30, 2021.

In assessing the ability to realize the deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based on these criteria, management believes it is more likely than not the Company will not realize the benefits of the federal, state, and foreign deductible differences. Accordingly, a full valuation allowance has been established.

17. CONTRACT BALANCES

The timing of revenue recognition, billings and collections may result in billed accounts receivable, unbilled receivables (contract assets), and customer advances and deposits (contract liabilities). The Company's payment terms and conditions vary by contract type, although terms generally include a requirement of payment of 70% to 90% of total contract consideration within 30 to 60 days of shipment with the remainder payable within 30 days of acceptance. In instances where the timing of revenue recognition differs from the timing of invoicing, the Company has determined that its contracts generally do not include a significant financing component.

Contract assets were recorded under other receivable while contract liabilities were recorded under accrued expenses in the balance sheet.

The following table is the reconciliation of contract balances.

	Sept. 30, 2021 (Unaudited)	Jun 30, 2021
Trade Accounts Receivable	9,403	8,293
Accounts Payable	3,224	3,702
Contract Assets	216	337
Contract Liabilities	603	628

Remaining Performance Obligation

As at September 30, 2021, the Company had \$505 of remaining performance obligations, which represents our obligation to deliver products and services. Given the profile of contract terms, majority of this amount is expected to be recognized as revenue over the next two years.

Refer to Note 14 “Business Segments” of the Notes to Condensed Consolidated Financial Statements for information related to revenue.

18. EARNINGS PER SHARE

As at September 30, 2021, the Company had \$505 of remaining performance obligations, which represents our obligation to deliver products and services. Given the profile of contract terms, the majority of this amount is expected to be recognized as revenue over the next two years.

Options to purchase 751,000 shares of Common Stock at exercise prices ranging from \$2.53 to \$5.98 per share were outstanding as of September 30, 2020. 17,714 stock options were included in the computation of diluted EPS for the three months ended September 30, 2020, because they were dilutive.

The following table is a reconciliation of the weighted average shares used in the computation of basic and diluted EPS for the period presented herein:

	Three Months Ended September 30,	
	2021 (Unaudited)	2020 (Unaudited)
Income / (Loss) attributable to Trio-Tech International common shareholders from continuing operations, net of tax	\$ 914	\$ (5)
Income/ (Loss) attributable to Trio-Tech International common shareholders from discontinued operations, net of tax	3	(3)
Net Income / (Loss) attributable to Trio-Tech International common shareholders	\$ 917	\$ (8)
Weighted average number of common shares outstanding - basic	3,913	3,686
Dilutive effect of stock options	94	18
Number of shares used to compute earnings per share – diluted	<u>4,007</u>	<u>3,704</u>
Basic earnings per share from continuing operations attributable to Trio-Tech International	0.23	-
Basic earnings per share from discontinued operations attributable to Trio-Tech International	-	-
Basic earnings per share from net income attributable to Trio-Tech International	<u>\$ 0.23</u>	<u>\$ -</u>
Diluted earnings per share from continuing operations attributable to Trio-Tech International	0.23	-
Diluted earnings per share from discontinued operations attributable to Trio-Tech International	-	-
Diluted earnings per share from net income attributable to Trio-Tech International	<u>\$ 0.23</u>	<u>\$ -</u>

19. STOCK OPTIONS

On September 24, 2007, the Company's Board of Directors unanimously adopted the 2007 Employee Stock Option Plan (the "2007 Employee Plan") and the 2007 Directors Equity Incentive Plan (the "2007 Directors Plan") each of which was approved by the shareholders on December 3, 2007. Each of those plans was amended during the term of such plan to increase the number of shares covered thereby. As of the last amendment thereof, the 2007 Employee Plan covered an aggregate of 600,000 shares of the Company's Common Stock and the 2007 Directors Plan covered an aggregate of 500,000 shares of the Company's Common Stock. Each of those plans terminated by its respective terms on September 24, 2017. These two plans were administered by the Board, which also established the terms of the awards.

On September 14, 2017, the Company's Board of Directors unanimously adopted the 2017 Employee Stock Option Plan (the "2017 Employee Plan") and the 2017 Directors Equity Incentive Plan (the "2017 Directors Plan") each of which was approved by the shareholders on December 4, 2017. Each of these plans is administered by the Board of Directors of the Company.

Assumptions

The fair value for the stock options granted to both employees and directors was estimated using the Black-Scholes option pricing model with the following assumptions, assuming:

- An expected life varying from 2.50 to 3.25 years, calculated in accordance with the guidance provided in SEC Staff bulletin No. 110 for plain vanilla options using the simplified method, since our equity shares have been publicly traded for only a limited period of time and we did not have sufficient historical exercise data at the grant date of the options;
- A risk-free interest rate varying from 0.11% to 2.35% (2021: 0.30% to 2.35%);
- no expected dividend payments; and
- expected volatility of 45.38% to 55.59%.

2017 Employee Stock Option Plan

The Company's 2017 Employee Plan permits the grant of stock options to its employees covering up to an aggregate of 300,000 shares of Common Stock. Under the 2017 Employee Plan, all options must be granted with an exercise price of not less than fair value as of the grant date and the options granted must be exercisable within a maximum of ten years after the date of grant, or such lesser period of time as is set forth in the stock option agreements. The options may be exercisable (a) immediately as of the effective date of the stock option agreement granting the option, or (b) in accordance with a schedule related to the date of the grant of the option, the date of first employment, or such other date as may be set by the Compensation Committee. Generally, options granted under the 2017 Employee Plan are exercisable within five years after the date of grant, and vest over the period as follows: 25% vesting on the grant date and the remaining balance vesting in equal installments on the next three succeeding anniversaries of the grant date. The share-based compensation will be recognized in terms of the grade method on a straight-line basis for each separately vesting portion of the award. Certain option awards provide for accelerated vesting if there is a change in control (as defined in the 2017 Employee Plan).

During the first quarter of fiscal year 2021, the Company did not grant any options pursuant to the 2017 Employee Plan. There were no stock options exercised during the three-month period ended September 30, 2021. The Company recognized \$12 stock-based compensation expenses during the three months ended September 30, 2021.

During the first quarter of fiscal year 2020, the Company did not grant any options pursuant to the 2017 Employee Plan. There were no stock options exercised during the three-month period ended September 30, 2020. The Company recognized \$6 stock-based compensation expenses during the three months ended September 30, 2020.

As of September 30, 2021, there were vested stock options granted under the 2017 Employee Plan covering a total of 164,750 shares of Common Stock. The weighted average exercise price was \$4.35 and the weighted average remaining contractual term was 2.49 years.

As of September 30, 2020, there were vested stock options granted under the 2017 Employee Plan covering a total of 98,000 shares of Common Stock. The weighted average exercise price was \$4.44 and the weighted average remaining contractual term was 3.16 years.

A summary of option activities under the 2017 Employee Plan during the three months period ended September 30, 2021, is presented as follows:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at July 1, 2021	267,000	\$ 4.21	3.22	\$ 290

A summary of the status of the Company's non-vested employee stock options during the three months ended September 30, 2020, is presented below:

	Options	Weighted Average Grant-Date Fair Value
Non-vested at July 1, 2020	98,000	\$ 3.39
Granted	-	-
Vested	-	-
Forfeited	-	-
Non-vested at September 30, 2020	98,000	\$ 3.39

2007 Employee Stock Option Plan

The 2007 Employee Plan terminated by its terms on September 24, 2017, and no further options may be granted thereunder. However, the options outstanding thereunder continue to remain outstanding and in effect in accordance with their terms. The 2007 Employee Plan permitted the issuance of options to employees.

As the 2007 Plan has terminated, the Company did not grant any options pursuant to the 2007 Employee Plan during the three months ended September 30, 2021, and September 30, 2020 respectively.

There were no options exercised during the three months ended September 30, 2021, and September 30, 2020. The Company did not recognize any stock-based compensation expenses during the three months ended September 30, 2021, and September 30, 2020.

As of September 30, 2021, there were vested stock options granted under the 2007 Employee Plan covering a total of 37,500 shares of Common Stock. The weighted-average exercise price was \$4.14 and the weighted average remaining contractual term was 0.49 years.

As of September 30, 2020, there were vested stock options granted under the 2007 Employee Plan covering a total of 77,500 shares of Common Stock. The weighted-average exercise price was \$3.69 and the weighted average remaining contractual term was 0.96 years.

A summary of option activities under the 2007 Employee Plan during the three months ended September 30, 2021, is presented as follows:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at July 1, 2021	37,500	\$ 4.14	0.75	\$ 34
Granted	-	-	-	-
Exercised	-	-	-	-
Forfeited or expired	-	-	-	-
Outstanding at September 30, 2021	37,500	\$ 4.14	0.49	\$ 3
Exercisable at September 30, 2021	37,500	\$ 4.14	0.49	\$ 3

There were no non-vested employee stock options during the three months ended September 30, 2021.

A summary of option activities under the 2007 Employee Plan during the three months ended September 30, 2020, is presented as follows:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at July 1, 2020	77,500	\$ 3.69	1.22	\$ -
Granted	-	-	-	-

Forfeited or expired	-	-	-	-
Outstanding at September 30, 2020	77,500	\$ 3.69	0.96	\$ 6
Exercisable at September 30, 2020	77,500	\$ 3.69	0.96	\$ 6

There were no non-vested employee stock options during the three months ended September 30, 2020.

2017 Directors Equity Incentive Plan

The 2017 Directors Plan initially covered an aggregate of 300,000 shares of the Company's common stock. The Company's board of directors approved an amendment to the 2017 Directors Plan in September 2020 to increase the shares covered thereby from 300,000 shares to an aggregate of 600,000 shares, which amendment was approved by the Company's shareholders at the annual meeting held in December 2020. The 2017 Directors Plan permits the grant of options to its directors in the form of nonqualified options and restricted stock. The exercise price of the nonqualified options is required to be 100% of the fair value of the underlying shares on the grant date. The options have five-year contractual terms and are exercisable immediately as of the grant date.

During the first quarter of fiscal year 2022, the Company did not grant any options pursuant to the 2017 Directors Plan. There were no stock options exercised during the three months ended September 30, 2021. The Company did not recognize any stock-based compensation expenses during the three months ended September 30, 2021.

During the first quarter of fiscal year 2021, the Company did not grant any options pursuant to the 2017 Directors Plan. There were no stock options exercised during the three months ended September 30, 2020. The Company did not recognize any stock-based compensation expenses during the three months ended September 30, 2020.

As all the stock options granted under the 2017 Directors Plan vest immediately on the date of grant, there were no unvested stock options granted under the 2017 Directors Plan as of September 30, 2021.

As of September 30, 2021, there were vested stock options granted under the 2017 Directors Plan covering a total of 320,000 shares of Common Stock. The weighted average exercise price was \$4.27 and the weighted average remaining contractual term was 2.97 years.

As of September 30, 2020, there were vested stock options granted under the 2017 Directors Plan covering a total of 240,000 shares of Common Stock. The weighted average exercise price was \$3.93 and the weighted average remaining contractual term was 3.49 years.

A summary of option activities under the 2017 Directors Plan during the three months ended September 30, 2021, is presented as follows:

	<u>Options</u>	<u>Weighted Average Exercise Price</u>	<u>Weighted Average Remaining Contractual Term (Years)</u>	<u>Aggregate Intrinsic Value</u>
Outstanding at July 1, 2021	320,000	\$ 4.27	3.22	\$ 340

Exercisable at September 30, 2020	<u>240,000</u>	<u>3.93</u>	<u>3.49</u>	<u>\$ 82</u>

2007 Directors Equity Incentive Plan

The 2007 Directors Plan terminated by its terms on September 24, 2017 and no further options may be granted thereunder. However, the options outstanding thereunder continue to remain outstanding and in effect in accordance with their terms. The 2007 Directors Plan permitted the issuance of options to directors.

As the 2007 Plan has terminated, the Company did not grant any options pursuant to the 2007 Directors Plan during the three months ended September 30, 2021, and September 30, 2020.

There were no stock option exercised during the three months ended September 30, 2021. The Company did not recognize any stock-based compensation expenses during the three months ended September 30, 2021.

12,500 stock options were exercised during the three months ended September 30, 2020. The Company did not recognize any stock-based compensation expenses during the three months ended September 30, 2020.

As of September 30, 2021, there were vested stock options granted under the 2007 Directors Plan covering a total of 50,000 shares of Common Stock. The weighted average exercise price was \$4.14 and the weighted average remaining contractual term was 0.49 years.

As of September 30, 2020, there were vested stock options granted under the 2007 Directors Plan covering a total of 237,500 shares of Common Stock. The weighted average exercise price was \$3.36 and the weighted average remaining contractual term was 0.61 years.

A summary of option activities under the 2007 Directors Plan during the three months ended September 30, 2021, is presented as follows:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at July 1, 2021	50,000	\$ 4.14	0.75	\$ 45

20. LEASES

Company as Lessor

Operating leases where we are lessor arise from the leasing of the Company's commercial and residential real estate investment property to third parties. Initial lease terms generally range from 12 to 60 months. Depreciation expense for assets subject to operating leases is taken into account primarily on the straight-line method over a period of twenty years in amounts necessary to reduce the carrying amount of the asset to its estimated residual value. Depreciation expenses relating to the property held as investments in operating leases was \$18 and \$17 for 3 months ended September 30, 2021, and September 30, 2020 respectively.

Future minimum rental income in China and Thailand to be received from fiscal year 2022 to fiscal year 2023 on noncancelable operating leases is contractually due as follows as of September 30, 2021:

Remainder of fiscal 2022	\$ 110
Fiscal 2023	\$ 12
	<u>\$ 122</u>

Future minimum rental income in China and Thailand to be received from fiscal year 2022 to fiscal year 2023 on noncancelable operating leases is contractually due as follows as of June 30, 2021:

Fiscal 2022	\$ 145
Fiscal 2023	<u>\$ 16</u>
	<u>\$ 161</u>

Sales-type leases under which the Company is the lessor arise from the lease of four units of chiller systems. The Company classifies its lease arrangements at inception of the arrangement. The lease term is 3 years, contains an automatic transfer of title at the end of the lease term and a guarantee of residual value at the end of the lease term. The customer is required to pay for executory cost such as taxes.

Financing receivables, consisting of net investment in sales-type leases and receivables from financed sales of four units of chiller systems are as follows:

Components of Lease Balances	September 30, 2021
Assets	
Gross financial sales receivable	\$ 60
Unearned finance income	(6)
Financed sales receivable	<u>\$ 54</u>
Net financed sales receivables due within one year	\$ 20
Net financed sales receivables due after one year	\$ 34

As of September 30, 2021, the financed sale receivables had a weighted average effective interest rate of 13.2% and weighted average remaining lease term of 2.5 years.

Company as Lessee

The Company (or an affiliate) is the lessee under operating leases for corporate offices and research and development facilities with remaining lease terms of 1 year to 3 years and finance leases for plant and equipment.

Supplemental balance sheet information related to leases was as follows (in thousands):

	September 30, 2021 (Unaudited)

	\$	\$
Current	672	197
Noncurrent	1,204	253

21. FAIR VALUE OF FINANCIAL INSTRUMENTS APPROXIMATE CARRYING VALUE

In accordance with ASC Topics 825 and 820, the following presents assets and liabilities measured and carried at fair value and classified by level of fair value measurement hierarchy:

There were no transfers between Levels 1 and 2 during the three months ended September 30, 2021 and 2020.

Term deposits (Level 2) – The carrying amount approximates fair value because of the short maturity of these instruments.

Restricted term deposits (Level 2) – The carrying amount approximates fair value because of the short maturity of these instruments.

Lines of credit (Level 3) – The carrying value of the lines of credit approximates fair value due to the short-term nature of the obligations.

Bank loans payable (Level 3) – The carrying value of the Company's Bank loans payable approximates its fair value as the interest rates associated with long-term debt is adjustable in accordance with market situations when the Company borrowed funds with similar terms and remaining maturities.

22. CONCENTRATIONS OF CUSTOMERS

The Company had two major customer that accounted for the following revenue and trade account receivables:

	For the Three Months Ended Sep 30,	
	2021	2020
Revenue		
- Customer A	40.3%	29.0%
- Customer B	13.0%	11.8%
Trade Account Receivables		
- Customer A	38.4%	33.1%
- Customer B	13.6%	5.3%

TRIO-TECH INTERNATIONAL AND SUBSIDIARIES

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (IN THOUSANDS, EXCEPT PER SHARE AMOUNTS)

Overview

The following should be read in conjunction with the condensed consolidated financial statements and notes in Item 1 above and with the audited consolidated financial statements and notes, the information under the headings "Risk Factors" and "Management's discussion and analysis of financial condition and results of operations" in our Annual Report on Form 10-K for the fiscal year ended June 30, 2021.

Trio-Tech International ("TTI") was incorporated in 1958 under the laws of the State of California. As used herein, the term "Trio-Tech" or "Company" or "we" or "us" or "Registrant" includes Trio-Tech International and its subsidiaries unless the context otherwise indicates. Our mailing address and executive offices are located at Block 1008 Toa Payoh North, Unit 03-09 Singapore 318996, and our telephone number is (65) 6265 3300.

The Company is a provider of reliability test equipment and services to the semiconductor industry. Our customers rely on us to verify that their semiconductor components meet or exceed the rigorous reliability standards demanded for aerospace, communications and other electronics products.

TTI generated approximately 99.9% of its revenue from its three core business segments in the test and measurement industry, i.e., manufacturing of test equipment, testing services and distribution of test equipment during the three months ended September 30, 2021. The Real Estate segment contributed only 0.1% to the total revenue during the three months ended September 30, 2021.

Manufacturing

TTI develops and manufactures an extensive range of test equipment used in the "front end" and the "back end" manufacturing processes of semiconductors. Our equipment includes leak detectors, autoclaves, centrifuges, burn-in systems and boards, HAST testers, temperature-controlled chucks, wet benches and more.

Testing

TTI provides comprehensive electrical, environmental, and burn-in testing services to semiconductor manufacturers in our testing laboratories in Asia and the U.S. Our customers include both manufacturers and end-users of semiconductor and electronic components who look to us when they do not want to establish their own facilities. The independent tests are performed to industry and customer specific standards.

Distribution

In addition to marketing our proprietary products, we distribute complementary products made by manufacturers mainly from the U.S., Europe, Taiwan and Japan. The products include environmental chambers, handlers, interface systems, vibration systems, shaker systems, solderability testers and other semiconductor equipment. Besides equipment, we also distribute a wide range of components such as connectors, sockets, LCD display panels and touch screen panels. Furthermore, our range of products are mainly targeted for industrial products rather than consumer products whereby the life cycle of the industrial products can last from three years to seven years.

Real Estate

Beginning in 2007, TTI has invested in real estate property in Chongqing, China, which has generated investment income from rental revenue, and investment returns from deemed loan receivables, which are classified as other income. The rental income is generated from the rental properties in MaoYe and FuLi in Chongqing, China. In the second quarter of fiscal 2015, the investment in JiaSheng, which was deemed as loans receivable, was transferred to down payment for purchase of investment property in China.

Impact of COVID-19 on our Business

In December 2019, a novel strain of coronavirus (“COVID-19”), was reported to have surfaced in China, resulting in shutdowns of manufacturing and commerce in the months that followed. Since then, the COVID-19 pandemic has spread to multiple countries worldwide and has resulted in authorities implementing numerous measures to try to contain the disease and slow its spread, such as travel bans and restrictions, quarantines, shelter-in-place orders and shutdowns. These measures have created significant uncertainty and economic disruption, both short-term and potentially long-term.

The health and safety of our employees and our customers are a top priority for us. In an effort to protect our employees, we took and continue to take proactive and aggressive actions, starting with the earliest signs of the outbreak, to adopt social distancing policies at our locations, including working from home and suspending employee travel. Our operations have been classified as part of the global supply chain and essential businesses in many jurisdictions, and employees who are working onsite are required to adhere to strict safety measures, including the use of masks and sanitizer, wellness screenings prior to accessing work sites, staggered break times to prevent congregation, prohibitions on physical contact with coworkers or customers, restrictions on access through only a single point of entry and exit, and utilizing video conferencing. We have also incorporated other rules such as restricting visitors to any of our facilities that remain open and proactively providing employees with hand sanitizer.

In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for fair presentation have been included. Operating results for the three months ended September 30, 2021 are not necessarily indicative of the results that may be expected for the fiscal year ending June 30, 2022. Certain accounting matters that generally require consideration of forecasted financial information were assessed regarding impacts from the COVID-19 pandemic as of September 30, 2021, and through the date of filing of this Quarterly Report dated November 15, 2021 using reasonably available information as of those dates. Those accounting matters assessed included, but were not limited to, allowance for doubtful accounts, the carrying value of long-lived tangible assets and the valuation allowances for tax assets. While the assessments resulted in no material impacts to the consolidated financial statements as of and for the quarter ended September 30, 2021, the Company believes the full impact of the pandemic remains uncertain and the Company will continue to assess if ongoing developments related to the pandemic may cause future material impacts to our consolidated financial statements.

As of September 30, 2021, the Company had cash and cash equivalents and short-term deposits totaling \$11,098 and an unused line of credit of \$5,397. We finance operations primarily through our existing cash balances, cash collected from operations, bank borrowings and capital lease financing. We believe these sources are sufficient to fund our operations for the foreseeable future.

While we have implemented safeguards and procedures to counter the impact of the COVID-19 pandemic, the full extent to which the pandemic has and will directly or indirectly impact us, including our business, financial condition, and result of operations, will depend on future developments that are highly uncertain and cannot be accurately predicted. This may include further mitigation efforts taken to contain the virus or treat its impact and the economic impact on local, regional, national and international markets although some of the countries had removed such policies. We will continue to actively monitor the situation and may take further actions that alter our business operations as may be required by the governments or that we determine are in the best interests of our employees, customers, suppliers and stockholders.

Critical Accounting Estimates & Policies

The discussion and analysis of the Company’s financial condition presented in this section are based upon our consolidated financial statements, which have been prepared in accordance with generally accepted accounting principles in the U.S. During the preparation of the consolidated financial statements, we are required to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates and judgments, including those related to sales, returns, pricing concessions, bad debts, inventories, investments, fixed assets, intangible assets, income taxes and other contingencies. Due to the COVID-19 pandemic, there has been uncertainty and disruption in the global economy and financial markets. These estimates and assumptions may change as new events occur and additional information is obtained. Actual results may differ from these estimates under different assumptions or conditions.

In response to the SEC’s Release No. 33-8040, Cautionary Advice Regarding Disclosure about Critical Accounting Policy, we have identified the most critical accounting policies upon which our financial status depends. We determined that those critical accounting policies are related to the inventory valuation; allowance for doubtful accounts; revenue recognition; impairment of property, plant and equipment; investment properties and income tax. These accounting policies are discussed in the relevant sections in this management’s discussion and analysis, including the Recently Issued Accounting Pronouncements discussed below.

Account Receivables and Allowance for Doubtful Accounts

During the normal course of business, we extend unsecured credit to our customers in all segments. Typically, credit terms require payment to be made between 30 to 90 days from the date of the sale. We generally do not require collateral from customers. We maintain our cash accounts at creditworthy financial institutions.

The Company's management considers the following factors when determining the collectability of specific customer accounts: customer creditworthiness, past transaction history with the customer, current economic industry trends, and changes in customer payment terms. The Company includes any account balances that are determined to be uncollectible, along with a general reserve, in the overall allowance for doubtful accounts. After all attempts to collect a receivable have failed, the receivable is written off against the allowance. Based on the information available to management, the Company believed that its allowance for doubtful accounts was adequate as of September 30, 2021.

Inventory Valuation

Inventories of our manufacturing and distribution segments, consisting principally of raw materials, works in progress, and finished goods, are stated at the lower of cost, using the first-in, first-out ("FIFO") method, or market value. The semiconductor industry is characterized by rapid technological change, short-term customer commitments and swiftly changing demand. Provisions for estimated excess and obsolete inventory are based on regular reviews of inventory quantities on hand and the latest forecasts of product demand and production requirements from our customers. Inventories are written down for not-saleable, excess or obsolete raw materials, works-in-process and finished goods by charging such write-downs to cost of sales. In addition to write-downs based on newly introduced parts, statistics and judgments are used for assessing provisions of the remaining inventory based on salability and obsolescence.

Property, Plant and Equipment & Investment Properties

Property, plant and equipment and investment properties are stated at cost, less accumulated depreciation and amortization. Depreciation is provided for over the estimated useful lives of the assets using the straight-line method. Amortization of leasehold improvements is provided for over the lease terms or the estimated useful lives of the assets, whichever is shorter, using the straight-line method.

Maintenance, repairs and minor renewals are charged directly to expense as incurred. Additions and improvements to property and equipment are capitalized. When assets are disposed of, the related cost and accumulated depreciation thereon are removed from the accounts and any resulting gain or loss is included in the consolidated statements of operations and comprehensive income or loss.

Foreign Currency Translation and Transactions

The United States dollar ("U.S. dollar") is the functional currency of the U.S. parent company. The Singapore dollar, the national currency of Singapore, is the primary currency of the economic environment in which the operations in Singapore are conducted. We also have business entities in Malaysia, Thailand, China and Indonesia, of which the Malaysian ringgit ("RM"), Thai baht, Chinese renminbi ("RMB") and Indonesian rupiah, are the national currencies. The Company uses the U.S. dollar for financial reporting purposes.

The Company translates assets and liabilities of its subsidiaries outside the U.S. into U.S. dollars using the rate of exchange prevailing at the balance sheet date, and the statement of operations is measured using average rates in effect for the reporting period. Adjustments resulting from the translation of the subsidiaries' financial statements from foreign currencies into U.S. dollars are recorded in shareholders' equity as part of accumulated comprehensive income or loss translation adjustment. Gains or losses resulting from transactions denominated in currencies other than functional currencies of the Company's subsidiaries are reflected in income for the reporting period.

Revenue Recognition

The Company adopted Accounting Standards Update ("ASU") No. 2014-09, ASC Topic 606, *Revenue from Contracts with Customers* ("ASC Topic 606"). This standard outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers.

We apply a five-step approach as defined in ASC Topic 606 in determining the amount and timing of revenue to be recognized: (1) identifying the contract with customer; (2) identifying the performance obligations in the contracts; (3) determining the transaction price; (4) allocating the transaction price to the performance obligations in the contract; and (5) recognizing revenue when the corresponding performance obligation is satisfied.

Revenue derived from testing services is recognized when testing services are rendered. Revenue generated from sale of products in the manufacturing and distribution segments are recognized when persuasive evidence of an arrangement exists, delivery of the products has occurred, customer acceptance has been obtained (which means the significant risks and rewards of ownership have been transferred to the customer), the price is fixed or determinable and collectability is reasonably assured. Certain customers can request for installation and training services to be performed for certain products sold in the manufacturing segment. These services are mainly for helping customers with the test runs of the machines sold and are considered a separate performance obligation. Such services can be provided by other entities as well, and these do not significantly modify the product. The Company recognizes the revenue at the point in time when the Company has satisfied its performance obligation.

In the real estate segment: (1) revenue from property development is earned and recognized on the earlier of the dates when the underlying property is sold or upon the maturity of the agreement; if this amount is uncollectible, the agreement empowers the repossession of the property, and (2) rental revenue is recognized on a straight-line basis over the terms of the respective leases. This means that, with respect to a particular lease, actual amounts billed in accordance with the lease during any given period may be higher or lower than the amount of rental revenue recognized for the period. Straight-line rental revenue is commenced when the tenant assumes possession of the leased premises. Accrued straight-line rents receivable represents the amount by which straight-line rental revenue exceeds rents currently billed in accordance with lease agreements.

Investment

The Company (a) evaluates the sufficiency of the total equity at risk, (b) reviews the voting rights and decision-making authority of the equity investment holders as a group, and whether there are any guaranteed returns, protection against losses, or capping of residual returns within the group and (c) establishes whether activities within the venture are on behalf of an investor with disproportionately few voting rights in making this Variable Interest Entity (“VIE”) determination. The Company would consolidate a venture that is determined to be a VIE if it was the primary beneficiary. Beginning January 1, 2010, a new accounting standard became effective and changed the method by which the primary beneficiary of a VIE is determined. Through a primarily qualitative approach, the variable interest holder, if any, who has the power to direct the VIE’s most significant activities is the primary beneficiary. To the extent that the investment does not qualify as VIE, the Company further assesses the existence of a controlling financial interest under a voting interest model to determine whether the venture should be consolidated.

Equity Method

The Company analyzes its investments in joint ventures to determine if the joint venture should be accounted for using the equity method. Management evaluates both Common Stock and in-substance Common Stock as to whether they give the Company the ability to exercise significant influence over operating and financial policies of the joint venture even though the Company holds less than 50% of the Common Stock and in-substance Common Stock. If so, the net income of the joint venture will be reported as “Equity in earnings of unconsolidated joint ventures, net of tax” in the Company’s consolidated statements of operations and comprehensive income or loss.

Cost Method

Investee companies not accounted for under the consolidation or the equity method of accounting are accounted for under the cost method of accounting. Under this method, the Company’s share of the earnings or losses of such investee companies is not included in the consolidated balance sheet or consolidated statements of operations and comprehensive income or loss. However, impairment charges are recognized in the consolidated statements of operations and comprehensive income or loss. If circumstances suggest that the value of the investee company has subsequently recovered, such recovery is not recorded.

Long-Lived Assets & Impairment

Our business requires heavy investment in manufacturing facilities and equipment that are technologically advanced but can quickly become significantly underutilized or rendered obsolete by rapid changes in demand. We have recorded intangible assets with finite lives related to our acquisitions.

We evaluate our long-lived assets with finite lives for impairment whenever events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. Factors considered important that could result in an impairment review include significant underperformance relative to expected historical or projected future operating results, significant changes in the manner of use of the assets or the strategy for our business, significant negative industry or economic trends, and a significant decline in our stock price for a sustained period of time. Impairment is recognized based on the difference between the fair value of the asset and its carrying value, and fair value is generally measured based on discounted cash flow analysis if there is significant adverse change.

While we have not identified any changes in circumstances requiring further impairment test in fiscal year 2021 other than the circumstances related to Singapore Theme Resort Project, we will continue to monitor impairment indicators, such as disposition activity, stock price declines or changes in forecasted cash flows in future periods. If the fair value of our reporting unit declines below the carrying value in the future, we may incur additional impairment charges.

During the third quarter of 2020, our operation in China provided impairment loss of \$139 for seven pieces of equipment because one of our customers’ products came to the end of its product burn-in cycle earlier than expected. The cost of converting the seven pieces of equipment outweighed the benefit of utilizing said equipment. Operations did not foresee any future usage of these assets. There will be no future economic cash inflow generated from these assets. Based on these events, we concluded that it was more likely than not that value-in-use of these assets was less than their carrying value. Full impairment of these assets has been recorded.

During the fourth quarter of 2021, The Company recorded an impairment charge of \$1,580 related to the doubtful recovery of a down payment on shop lots in the Singapore Theme Resort Project in Chongqing, China. The Company elected to take this non-cash impairment charge because of increased uncertainties regarding the project's viability given the developers weakening financial condition as well as uncertainties arising from the negative real-estate environment in China, implementation of control measures on real-estate lending and its relevant government policies, together with effects of the ongoing pandemic.

Fair Value Measurements

Under the standard ASC Topic 820, Fair Value Measurements and Disclosures ("ASC Topic 820"), fair value refers to the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between participants in the market in which the reporting entity transacts its business. ASC Topic 820 clarifies the principle that fair value should be based on the assumptions market participants would use when pricing the asset or liability. In support of this principle, ASC Topic 820 establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. Under the standard, fair value measurements would be separately disclosed by level within the fair value hierarchy.

Income Tax

We account for income taxes using the liability method in accordance with the provisions of ASC Topic 740, Accounting for Income Taxes ("ASC Topic 740"), which requires an entity to recognize deferred tax liabilities and assets. Deferred tax assets and liabilities are recognized for the future tax consequence attributable to the difference between the tax bases of assets and liabilities and their reported amounts in the financial statements, which will result in taxable or deductible amounts in future years. Further, the effects of enacted tax laws or rate changes are included as part of deferred tax expenses or benefits in the period that covers the enactment date. Management believed it was more likely than not that the future benefits from these timing differences would not be realized. Accordingly, a full allowance was provided as of September 30, 2021 and 2020.

The calculation of tax liabilities involves dealing with uncertainties in the application of complex global tax regulations. We recognize potential liabilities for anticipated tax audit issues in the U.S. and other tax jurisdictions based on our estimate of whether, and the extent to which, additional taxes will be due. If the estimate of tax liabilities proves to be less than the ultimate assessment, a further charge to expense would result.

Stock-Based Compensation

We calculate compensation expense related to stock option awards made to employees and directors based on the fair value of stock-based awards on the date of grant. We determine the grant date fair value of our stock option awards using the Black-Scholes option pricing model and for awards without performance condition the related stock-based compensation is recognized over the period in which a participant is required to provide service in exchange for the stock-based award, which is generally four years. We recognize stock-based compensation expense in the consolidated statements of shareholders' equity based on awards ultimately expected to vest. Forfeitures are estimated on the date of grant and revised if actual or expected forfeiture activity differs materially from original estimates.

Determining the fair value of stock-based awards at the grant date requires significant judgment. The determination of the grant date fair value of stock-based awards using the Black-Scholes option-pricing model is affected by our estimated common stock fair value as well as other subjective assumptions including the expected term of the awards, the expected volatility over the expected term of the awards, expected dividend yield and risk-free interest rates. The assumptions used in our option-pricing model represent management's best estimates and are as follows:

- Fair Value of Common Stock. We determined the fair value of each share of underlying common stock based on the closing price of our common stock on the date of grant.
- Expected Term. The expected term of employee stock options reflects the period for which we believe the option will remain outstanding based on historical experience and future expectations.
- Expected Volatility. We base expected volatility on our historical information over a similar expected term.

Noncontrolling Interests in Consolidated Financial Statements

We adopted ASC Topic 810, *Consolidation* ("ASC Topic 810"). This guidance establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. This guidance requires that noncontrolling interests in subsidiaries be reported in the equity section of the controlling company's balance sheet. It also changes the manner in which the net income of the subsidiary is reported and disclosed in the controlling company's income statement.

First Quarter Fiscal Year 2022 Highlights

- Total revenue increased by \$3,330, or 48.7%, to \$10,171 in the first quarter of fiscal year 2022, compared to \$6,841 for the same period in fiscal year 2021.
- Manufacturing segment revenue increased by \$937, or 35.7%, to \$3,562 for the first quarter of fiscal year 2022, compared to \$2,625 for the same period in fiscal year 2021.
- Testing segment revenue increased by \$1,646, or 55.7%, to \$4,600 for the first quarter of fiscal year 2022, compared to \$2,954 for the same period in fiscal year 2021.
- Distribution segment revenue increased by \$740, or 58.8%, to \$1,998 for the first quarter of fiscal year 2022, compared to \$1,258 for the same period in fiscal year 2021.
- Real estate segment rental revenue increased by \$7, or 175%, to \$11 for the first quarter of fiscal year 2022 compared to \$4 for the same period in fiscal year 2021.
- The overall gross profit margin increased by 9.0% to 31.2% for the first quarter of fiscal year 2022, from 22.2% for the same period in fiscal year 2021.
- General and administrative expenses increased by \$320, or 19.3%, to \$1,980 for the first quarter of fiscal year 2022, from \$1,660 for the same period in fiscal year 2021.
- Selling expenses increased by \$36, or 32.4%, to \$147 for the first quarter of fiscal year 2022, from \$111 for the same period in fiscal year 2021.
- Other income decreased by \$50, or 23.7%, to \$161 in the first quarter of fiscal year 2022 compared to \$211 in the same period in fiscal year 2021.
- Income from operations was \$970 for the first quarter of fiscal year 2022, an improvement of \$1,297, as compared to loss from operations of \$327 for the same period in fiscal year 2021.
- Income tax expenses was \$180 in the first quarter of fiscal year 2022, an increase of \$173, as compared to an income tax expense of \$7 in the same period in fiscal year 2021.
- During the first quarter of fiscal year 2022, income from continuing operations before noncontrolling interest, net of tax was \$923, as compared to loss from continuing operations before noncontrolling interest of \$160 for the same period in fiscal year 2021.
- Net income attributable to noncontrolling interest for the first quarter of fiscal year 2022 was \$11, an improvement of \$169, as compared to net loss attributable to noncontrolling interest of \$158 in the same period in fiscal year 2021.
- Basic Earnings per share for the first quarter of fiscal year 2022 were \$0.23, as compared to earnings per share of \$nil for the same period in fiscal year 2021.
- Dilutive Earnings per share for the first quarter of fiscal year 2022 were \$0.23, as compared to earnings per share of \$nil for the same period in fiscal year 2021.
- Total assets increased by \$1,805 to \$40,111 as of September 30, 2021, compared to \$38,306 as of June 30, 2021.
- Total liabilities increased by \$1,154 to \$13,407 as of September 30, 2021, compared to \$12,253 as of June 30, 2021.

Results of Operations and Business Outlook

The following table sets forth our revenue components for the three months ended September 30, 2021 and 2020, respectively.

Revenue Components	Three Months Ended September 30,	
	2021	2020
Revenue:		
Manufacturing	35.0%	38.3%
Testing Services	45.2	43.2
Distribution	19.7	18.4
Real Estate	0.1	0.1
Total	100.0%	100.0%

Revenue for the three months ended September 30, 2021, was \$10,171, an increase of \$3,330 from \$6,841, when compared to the revenue for the same period of the prior fiscal year. As a percentage, revenue increased by 48.7% for the three months ended September 30, 2021, when compared to revenue for the same period of the prior year.

For the three months ended September 30, 2021, there was an increase in revenue across all segments when compared to the same period of the prior fiscal year.

Total revenue into and within China, the Southeast Asia regions and other countries (except revenue into and within the United States) increased by \$3,265, or 51.1%, to \$9,672 for the three months ended September 30, 2021, as compared with \$6,407 for the same period of last fiscal year.

Total revenue into and within the U.S. was \$499 for the three months ended September 30, 2021, an increase of \$66 from \$434 for the same period of the prior year.

Revenue within our four current segments for the three months ended September 30, 2021, is discussed below.

Manufacturing Segment

Revenue in the manufacturing segment as a percentage of total revenue was 35.0% for the three months ended September 30, 2021, a decrease of 3.3% of total revenue when compared to 38.3% in the same period of the last fiscal year. The absolute amount of revenue increased by \$937 to \$3,562 for the three months ended September 30, 2021, compared to \$2,625, for the same period of the last fiscal year.

Revenue in the manufacturing segment for the three months ended September 30, 2021, increased primarily due to an increase in orders by customers in the Singapore and U.S. operations.

Revenue in the manufacturing segment from a major customer accounted for 33.2% and 12.5% of our revenue in the manufacturing segment for the three months ended September 30, 2021, and 2020, respectively. The future revenue in our manufacturing segment will be affected by the purchase and capital expenditure plans of this major customer if the customer base cannot be increased.

Testing Services Segment

Revenue in the testing segment as a percentage of total revenue was 45.2% for the three months ended September 30, 2021, an increase of 2.0% of the total revenue when compared to 43.2% for the same period of the last fiscal year. The absolute amount of revenue increased by \$1,646 to \$4,600 for the three months ended September 30, 2021, as compared to \$2,954 for the same period of the last fiscal year.

Revenue in the testing segment for the three months ended September 30, 2021, increased primarily due to an increase in the orders across the Group, except for the Malaysia operation. Price adjustments also partially contributed to the increase in revenue from the testing segment.

Revenue in the testing segment from a major customer accounted for 63.7% and 56.3% of our revenue in the testing segment for the three months ended September 30, 2021 and 2020, respectively. The future revenue in the testing segment will be affected by the demands of this major customer if the customer base cannot be increased. Demand for testing services varies from country to country depending on any changes taking place in the market and our customers' forecasts. As it is difficult to accurately forecast fluctuations in the market, management believes it is necessary to maintain testing facilities in close proximity to the customers in order to make it convenient for them to send us their newly manufactured parts for testing and to enable us to maintain a share of the market.

At the date of this report, our Suzhou, China operation is negotiating a five-year contract with a long-term customer to establish a new facility to supply testing and burn-in services for a number of various semiconductor components with applications in computing and automotive electronics.

Distribution Segment

Revenue in the distribution segment as a percentage of total revenue was 19.7% for the three months ended September 30, 2021, an increase of 1.3% of total revenue when compared to 18.4% in the same period of the last fiscal year. The absolute amount of revenue increased by \$740 to \$1,998 for the three months ended September 30, 2021, compared to \$1,258 for the same period of the last fiscal year.

Revenue in the distribution segment for the three months ended September 30, 2021, increased primarily due to an increase in revenue generated from customers in the Singapore operation.

Demand for the distribution segment varies depending on the demand for our customers' products, the changes taking place in the market and our customers' forecasts. Hence it is difficult to accurately forecast fluctuations in the market.

Real Estate Segment

The real estate segment accounted for 0.1% of total revenue for the three months ended September 30, 2021 and 0.1% of total revenue for three months ended September 30, 2020. The absolute amount of revenue in the real estate segment was \$11 for the three months ended September 30, 2021 and \$4 for the three months ended September 30, 2020.

Uncertainties and Remedies

There are several influencing factors which create uncertainties when forecasting performance, such as the constantly changing nature of technology, specific requirements from the customer, decline in demand for certain types of burn-in devices or equipment, decline in demand for testing services and fabrication services, and other similar factors. One factor that influences uncertainty is the highly competitive nature of the semiconductor industry. Another is that some customers are unable to provide a forecast of the products required in the upcoming weeks; hence it is difficult to plan for the resources needed to meet these customers' requirements due to short lead time and last-minute order confirmation. This will normally result in a lower margin for these products as it is more expensive to purchase materials in a short time frame. However, the Company has taken certain actions and formulated certain plans to deal with and to help mitigate these unpredictable factors. For example, in order to meet manufacturing customers' demands upon short notice, the Company maintains higher inventories but continues to work closely with its customers to avoid stockpiling. We believe that we have improved customer service from staff through our efforts to keep our staff up to date on the newest technology and stressing the importance of understanding and meeting the stringent requirements of our customers. Finally, the Company is exploring new markets and products, looking for new customers, and upgrading and improving burn-in technology while at the same time searching for improved testing methods for higher technology chips.

We are in the process of implementing an ERP System as part of a multi-year plan to integrate and upgrade our systems and processes. The implementation of this ERP system was scheduled to occur in phases over a few years. The operational and financial systems in our Singapore, Malaysia and China operations were transitioned to the new system in fiscal 2018, fiscal 2019 and fiscal 2021, respectively.

This implementation effort will continue until the Company's consolidation process is substantially automated using the new system by the end of fiscal 2022.

As a phased implementation of this system occurs, we are experiencing certain changes to our processes and procedures which, in turn, result in changes to our internal control over financial reporting. While we expect the new ERP system to strengthen our internal financial controls by automating certain manual processes and standardizing business processes and reporting across our organization, management will continue to evaluate and monitor our internal controls as processes and procedures in each of the affected areas evolve.

The Company's primary exposure to movements in foreign currency exchange rates relates to non-U.S. dollar-denominated sales and operating expenses in its subsidiaries. Strengthening of the U.S. dollar relative to foreign currencies adversely affects the U.S. dollar value of the Company's foreign currency-denominated sales and earnings, and generally leads the Company to raise international pricing, potentially reducing demand for the Company's products. Margins on sales of the Company's products in foreign countries and on sales of products that include components obtained from foreign suppliers could be materially adversely affected by foreign currency exchange rate fluctuations. In some circumstances, for competitive or other reasons, the Company may decide not to raise local prices to fully offset the dollar's strengthening, or at all, which would adversely affect the U.S. dollar value of the Company's foreign currency-denominated sales and earnings. Conversely, a strengthening of foreign currencies relative to the U.S. dollar, while generally beneficial to the Company's foreign currency denominated sales and earnings, could cause the Company to reduce international pricing, thereby limiting the benefit. Additionally, strengthening of foreign currencies may also increase the Company's cost of product components denominated in those currencies, thus adversely affecting gross margins.

In December 2019, COVID-19 was reported to have surfaced in China, resulting in shutdowns of manufacturing and commerce in the months that followed. Since then, the COVID-19 pandemic has spread to multiple countries worldwide and has resulted in authorities implementing numerous measures to try to contain the disease and slow its spread, such as travel bans and restrictions, quarantines, shelter-in-place orders and shutdowns. These measures have created significant uncertainty and economic disruption, both short-term and potentially long-term.

The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interest of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the virus and our ability to perform critical functions could be harmed.

The degree to which COVID-19 impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including but not limited to the duration and spread of the pandemic, its severity, the action to contain the virus or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. Even after the COVID-19 pandemic has subsided, we may experience material adverse impacts on our business as a result of the global economic impact and any recession that has occurred or may occur in the future. There are no comparable recent events that provide guidance as to the effect the spread of COVID-19 as a global pandemic may have, and, as a result, the ultimate impact of the pandemic on our operations and financial results is highly uncertain and subject to change.

Comparison of the Three Months Ended September 30, 2021, and September 30, 2020

The following table sets forth certain consolidated statements of income data as a percentage of revenue for the three months ended September 30, 2021 and 2020, respectively:

	Three Months Ended September 30,	
	2021	2020
Revenue	100.0%	100.0%
Cost of sales	68.8	77.8
Gross Margin	31.2%	22.2%
Operating expenses		
General and administrative	19.4%	24.3%
Selling	1.4	1.6
Research and development	1.0	1.1
Gain on disposal of property, plant and equipment	-	-
Total operating expenses	21.8%	27.0%
Income / (Loss) from Operations	9.4%	(4.8)%

Overall Gross Margin

Overall gross margin as a percentage of revenue increased by 9.0% to 31.2% for the three months ended September 30, 2021, from 22.2% for the same period of the last fiscal year.

Gross profit margin as a percentage of revenue in the manufacturing segment increased by 5.1% to 31.1% for the three months ended September 30, 2021, as compared to 26.2% for the same period in last fiscal year. The increase in gross profit margin was primarily due to an increase in revenue coupled with a higher proportion of sales of high profit margin products in the three months ended September 30, 2021, as compared to the same period in the last fiscal year. In absolute dollar amounts, gross profit in the manufacturing segment increased by \$440 to \$1,128 for the three months ended September 30, 2021, from \$688 for the same period of the last fiscal year.

Gross profit margin as a percentage of revenue in the testing segment increased by 15.9% to 37.3% for the three months ended September 30, 2021, from 21.4% in the same period of the last fiscal year. Significant portions of our cost of goods sold are fixed in the testing segment. Thus, as the demand of services and factory utilization increases, the fixed costs are spread over the increased output, which increases the gross profit margin. In absolute dollar amounts, gross profit in the testing segment increased by \$1,085 to \$1,717 for the three months ended September 30, 2021, from \$632 for the same period of the last fiscal year.

Gross profit margin of the distribution segment is not only affected by the market price of the products we distribute, but also the mix of products we distribute, which changes frequently as a result of changes in market demand. Gross profit margin as a percentage of revenue in the distribution segment increased by 0.03% to 17.1% for the three months ended September 30, 2021, from 16.8% in the same period of the last fiscal year. In absolute dollar amounts, gross profit in the distribution segment for the three months ended September 30, 2021, was \$342 as compared to \$211 in the same period of the last fiscal year.

In absolute dollar amounts, for the three months ended September 30, 2021, gross loss in the real estate segment was \$8, as compared to \$13 for the same period of last fiscal year. The decrease in gross loss was mainly due to an increase in rental income.

Operating Expenses

Operating expenses for the three months ended September 30, 2021 and 2020 were as follows:

(Unaudited)	Three Months Ended September 30,	
	2021	2020
General and administrative	\$ 1,980	\$ 1,660
Selling	147	111
Research and development	82	75
Gain on disposal of property, plant and equipment	-	(1)
Total	\$ 2,209	\$ 1,845

General and administrative expenses increased by \$320, or 19.3%, from \$1,660 to \$1,980 for the three months ended September 30, 2021, compared to the same period of last fiscal year. The increase in general and administrative expenses was mainly attributable to higher payroll expenses in the U.S. and Singapore operations and higher staff benefits expenses in the China operation.

Selling expenses increased by \$36, or 32.4%, from \$111 to \$147 for the three months ended September 30, 2021, compared to the same period of last fiscal year. The increase in selling expenses was primarily attributable to an increase in commission expenses in the manufacturing segment of the Singapore operations as a result of an increase in commissionable revenue.

Income / (Loss) from Operations

Income from operations was \$970 for the three months ended September 30, 2021, an improvement of \$1,297, as compared to the loss from operations of \$327 for the three months ended September 30, 2020. The increase was mainly due to the increase in gross profit which was partially offset by the increase in operating expenses, as previously discussed.

Interest Expense

Interest expense for the three months ended September 30, 2021 and 2020 were as follows:

(Unaudited)	Three Months Ended September 30,	
	2021	2020
Interest expenses	\$ 28	\$ 37

Interest expense was \$28 for the three months ended September 30, 2021, a decrease of \$9, or 24.3% as compared to \$37 for the three months ended September 30, 2020. The decrease was due to a decrease in the utilization of bank facilities in Malaysia. As of September 30, 2021, the Company had an unused line of credit of \$5,397 as compared to \$5,621 at September 30, 2020.

Other Income

Other income for the three months ended September 30, 2021 and 2020 were as follows:

	Three Months Ended September 30,	
	2021	2020
Interest income	\$ 22	40
Other rental income	29	21
Exchange gain / (loss)	34	(44)
Bad debt recovery	2	5
Dividend income	-	2
Government grant	70	154
Other miscellaneous income	4	33
Total	\$ 161	\$ 211

Other income decreased by \$50 to \$161 for the three months ended September 30, 2021 from \$211 as compared to the same period in the last fiscal year. The decrease was mainly due to a decrease in the interest income and the government grant. The decreases were partially offset with the favorable foreign exchange movement for the three months ended September 30, 2021.

During the first quarter of fiscal year 2022, the Company received government grants amounting to \$70, of which \$42 were the financial assistance received from the Malaysia and Thailand governments amid the COVID-19 pandemic.

During the first quarter of fiscal year 2021, the Company received government grants of \$154 from the local government in the Singapore and Malaysia operations, of which \$142 reflects financial assistance to mitigate the negative impact on the businesses amid the pandemic.

Income Tax Expenses

The Company's income tax expense was \$180 and \$7 for the three months ended September 30, 2021, and September 30, 2020, respectively. The increase in income tax expenses was primarily due to an increase in the taxable income in the U.S., Singapore and Thailand operation.

Noncontrolling Interest

As of September 30, 2021, we held a 55% interest in Trio-Tech (Malaysia) Sdn. Bhd., Trio-Tech (Kuala Lumpur) Sdn. Bhd., SHI International Pte. Ltd., and PT. SHI Indonesia. We also held a 76% interest in Prestal Enterprise Sdn. Bhd. The share of net profit from the subsidiaries by the noncontrolling interest for the three months ended September 30, 2021, \$11, a change of \$169 compared to the share of net loss from the subsidiaries by the noncontrolling interest of \$158 for the same period of the previous fiscal year. The improvement was attributable to the net profit generated by the Malaysia operation as compared to the same period in the previous fiscal year.

Net Income / (Loss) Attributable to Trio-Tech International Common Shareholders

Net Income attributable to Trio-Tech International common shareholders for the three months ended September 30, 2021, was \$917, an improvement of \$925, as compared to a net loss of \$8 for the same period last fiscal year.

Earnings per Share

Basic earnings per share from continuing operations were \$0.23 for the three months ended September 30, 2021, as compared to \$nil for the same period in the last fiscal year. Basic earnings per share from discontinued operations were \$nil for both the three months ended September 30, 2021 and 2020.

Diluted earnings per share from continuing operations were \$0.23 for the three months ended September 30, 2021, as compared to \$nil for the same period in the last fiscal year. Diluted earnings per share from discontinued operations were \$nil for both the three months ended September 30, 2021 and 2020.

Segment Information

The revenue, gross margin and income or loss from operations for each segment during the first quarter of fiscal year 2022 and fiscal year 2021 are presented below. As the revenue and gross margin for each segment have been discussed in the previous section, only the comparison of income or loss from operations is discussed below.

Manufacturing Segment

The revenue, gross margin and income/(loss) from operations for the manufacturing segment for the three months ended September 30, 2021 and 2020 were as follows:

(Unaudited)	Three Months Ended September 30,	
	2021	2020
Revenue	\$ 3,562	\$ 2,625
Gross margin	31.7%	26.2%
Income / (Loss) from operations	\$ 300	\$ (18)

Income from operations from the manufacturing segment was \$300 as compared to loss from operations of \$18 in the same period of the last fiscal year, primarily due to an increase in gross margin of \$440 which was partially offset by the increase in operating expenses of \$122. Operating expenses for the manufacturing segment were \$828 and \$706 for the three months ended September 30, 2021 and 2020, respectively. The increase in operating expenses was mainly due to an increase of \$82 in general and administrative expenses, \$22 in selling expenses, \$5 in research and development expenses and \$12 in corporate overhead expenses. The increase in general and administrative expenses was mainly attributable to an increase in payroll related expenses in the Singapore operations. The increase in selling expenses was primarily attributable to an increase in commission expenses in the manufacturing segment of the Singapore operations as a result of an increase in commissionable revenue.

Testing Segment

The revenue, gross margin and income/(loss) from operations for the testing segment for the three months ended September 30, 2021 and 2020 were as follows:

(Unaudited)	Three Months Ended September 30,	
	2021	2020
Revenue	\$ 4,600	\$ 2,954
Gross margin	37.3%	21.4%
Income/(Loss) from operations	\$ 536	\$ (337)

Income from operations in the testing segment for the three months ended September 30, 2021, was \$536, an improvement of \$873 from loss from operations of \$337 in the same period of the last fiscal year. The improvement was mainly attributable to an increase of gross profit margin as discussed earlier which was partially offset by the increase in operating expenses. Operating expenses were \$1,181 and \$970 for the three months ended September 30, 2021, and 2020, respectively.

The increase in operating expenses was mainly due to an increase of \$126 in general and administrative expenses and \$74 in corporate overhead expenses. The increase in general and administrative expenses was mainly attributable to an increase in payroll related and staff-benefit expenses in the China operation. The increase in corporate overhead expenses was due to a change in the corporate overhead allocation as compared to the same period last fiscal year. Corporate charges are allocated on a predetermined fixed charge basis.

Distribution Segment

The revenue, gross margin and income from operations for the distribution segment for the three months ended September 30, 2021 and 2020 were as follows:

(Unaudited)	Three Months Ended September 30,	
	2021	2020
Revenue	\$ 1,998	\$ 1,258
Gross margin	17.1%	16.8%
Income from operations	\$ 254	\$ 124

Income from operations was \$254 for the three months ended September 30, 2021, as compared to \$124 for the same period of last fiscal year. The increase of \$130 was mainly due to an increase of \$131 in the gross margin, as discussed earlier. Operating expenses were \$88 and \$87 for the three months ended September 30, 2021 and 2020, respectively.

Real Estate Segment

The revenue, gross margin and loss from operations for the real estate segment for the three months ended September 30, 2021 and 2020 were as follows:

(Unaudited)	Three Months Ended September 30,	
	2021	2020
Revenue	\$ 11	\$ 4
Gross margin	(72.7)%	(325.0)%
Loss from operations	\$ (23)	\$ (27)

Loss from operations in the real estate segment for the three months ended September 30, 2021, was \$23 compared to \$27 for the same period of last fiscal year. Operating expenses were \$15 and \$14 for the three months ended September 30, 2021 and 2020, respectively.

Corporate

The loss from operations for Corporate for the three months ended September 30, 2021 and 2020 was as follows:

(Unaudited)	Three Months Ended September 30,	
	2021	2020
Loss from operations	\$ (97)	\$ (69)

Corporate operating loss was \$97 for the three months ended September 30, 2021, an increase of \$28 from \$69 in the same period of the last fiscal year. The increase was mainly attributable to an increase in general and administrative expenses.

Financial Condition

During the three months ended September 30, 2021, total assets increased by \$1,805 to \$40,111 compared to \$38,306 as at June 30, 2021. The increase in total assets was primarily due to an increase in trade account receivables, other receivables, inventories, prepaid expenses and other current assets, deferred tax assets, other assets, and operating lease right-of-use assets, which was partially offset by a decrease in cash and cash equivalents, short-term deposits, investment properties, property, plant and equipment, financed sales receivable and restricted term deposits.

Cash and cash equivalents were \$5,173 as at September 30, 2021, reflecting a decrease of \$663 from \$5,836 as at June 30, 2021, primarily due to the Company generated operating cash outflow of \$765, which was partially offset by the cash inflow of \$226 generated from investing activities for the three months ended September 30, 2021.

Short-term deposits were \$5,925 as at September 30, 2021, reflecting a decrease of \$726 from \$6,651 as at June 30, 2021. The withdrawal of the short-term deposits was mainly for operational purposes in the China and Malaysia operations.

As at September 30, 2021, the trade accounts receivable balance increased by \$1,110 to \$9,403, from \$8,293 as at June 30, 2021, primarily due to an increase in the overall revenue for the first three months of fiscal year 2022 as compared to the overall revenue in the fourth quarter of last fiscal year. The number of days' sales outstanding in accounts receivables for the Group was 78 and 79 days at the end of the first quarter of fiscal year 2022 and the end of the last fiscal year, respectively.

As at September 30, 2021, other receivables were \$692, reflecting an increase of \$30 from \$662 as at June 30, 2021.

Inventories as at September 30, 2021, were \$2,410, an increase of \$330, as compared to \$2,080 as at June 30, 2021. The increase in inventories was in line with an increase in orders by customers in the manufacturing segment of Singapore operations, which resulted in an increase in the work-in-progress.

Prepaid expenses were \$1,315 as at September 30, 2021, compared to \$418 as at June 30, 2021. The increase of \$897 was primarily due to the advance payment made for the renovation expense in the China operation.

Investment properties' net in China were \$661 as at September 30, 2021, and \$681 as at June 30, 2021. The decrease was primarily due to the depreciation charged for the period.

Property, plant and equipment decreased by \$198 from \$9,531 as at June 30, 2021, to \$9,333 as at September 30, 2021, mainly due to depreciation charged for the period and the foreign currency exchange movement between June 30, 2021 to September 30, 2021. The decrease was partially offset by the new acquisition of property, plant and equipment in the Singapore, Malaysia, Thailand and China operations.

Restricted cash decreased by \$19 to \$1,722 as at September 30, 2021, as compared to \$1,741 as at June 30, 2021. This was primarily due to the foreign currency exchange movement between June 30, 2021, and September 30, 2021.

Other assets increased by \$34 to \$296 as at September 30, 2021, as compared to \$262 as at June 30, 2021. This was mainly due to down payments made for the purchase of equipment to property, plant and equipment in the Malaysia operation.

Line of credit increased by \$177 to \$249 as at September 30, 2021, as compared to \$72 as at June 30, 2021. This was due to higher utilization of the bank facilities in the Singapore operation.

Accounts payable decreased by \$478 to \$3,224 as at September 30, 2021, as compared to \$3,702 as at June 30, 2021. This was due to more payments made in the first quarter of fiscal 2022, compared to the last quarter of fiscal 2021 in the Singapore operation.

Accrued expenses increased by \$509 to \$3,872 as at September 30, 2021, as compared to \$3,363 as at June 30, 2021. The increase in accrued expenses was mainly due to an increase in the accrued purchases and accrued payroll costs in the Singapore operation.

Bank loans payable decreased by \$133 to \$1,927 as at September 30, 2021, as compared to \$2,060 as at June 30, 2021. This was due to the repayments made in our Malaysia operations.

Finance leases decreased by \$59 to \$391 as at September 30, 2021, as compared to \$450 as at June 30, 2021. This was due to the repayment of finance leases made in the Singapore operations.

Operating lease right-of-use assets and the corresponding lease liability increased by \$1,025 to \$2,901, as at September 30, 2021, as compared to \$1,876 as at June 30, 2021. The increase was due to the new lease agreement entered in the China operation. The decrease was partially offset by the repayment made and the operating lease expenses charged for the period.

Liquidity Comparison

Net cash used in operating activities increased by \$1,174 to an outflow of \$711 for the three months ended September 30, 2021 from an inflow of \$463 for the same period of the last fiscal year. The increase in net cash outflow used in operating activities was primarily due to a decrease in trade account receivables by \$1,324, a decrease in prepaid expenses and other current assets by \$964. These decreases were partially offset by an increase in net income by \$1,094.

Net cash provided by investing activities increased by \$319 to an inflow of \$226 for the three months ended September 30, 2021, from an outflow of \$93 for the same period of the last fiscal year. The increase in cash inflow was primarily due to uplift from unrestricted term deposits by \$664. The increase was partially offset by an increase of cash outflow of \$351 from capital expenditure.

Net cash provided by financing activities for the three months ended September 30, 2021, was \$17, representing an increase of \$228, as compared to cash outflow of \$211 during the three months ended September 30, 2020. The increase in cash inflow was mainly attributable to an increase in cash inflow by \$478 from the proceeds of lines of credit and a decrease in cash outflow by \$122 from the dividends paid on noncontrolling interest. These increases were partially offset by an increase in cash outflow of \$127 from the payment on lines of credit and a decrease in cash inflow of \$208 from proceeds of bank loans.

We believe that our projected cash flows from operations, borrowing availability under our revolving lines of credit, cash on hand, trade credit and the secured bank loan will provide the necessary financial resources to meet our projected cash requirements for at least the next 12 months including the project that is under negotiation in our Suzhou, China operation.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not applicable.

ITEM 4. CONTROLS AND PROCEDURES

An evaluation was carried out by the Company's Chief Executive Officer and Chief Financial Officer of the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of September 30, 2021, the end of the period covered by this Form 10-Q. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that these disclosure controls and procedures were effective at a reasonable level.

Changes in Internal Control Over Financial Reporting

Except as discussed below, there has been no change in the Company's internal control over financial reporting during the fiscal quarter ended September 30, 2021, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Enterprise Resource Planning (ERP) Implementation

We are in the process of implementing an ERP System as part of a multi-year plan to integrate and upgrade our systems and processes. The implementation of this ERP system was scheduled to occur in phases over a few years. The operational and financial systems in our Singapore, Malaysia and China operations were transitioned to the new system in fiscal 2018, fiscal 2019 and fiscal 2021, respectively.

This implementation effort will continue till the Company's consolidation process is substantially automated using the new system in fiscal 2022.

As a phased implementation of this system occurs, we are experiencing certain changes to our processes and procedures which, in turn, result in changes to our internal control over financial reporting. While we expect the new ERP system to strengthen our internal financial controls by automating certain manual processes and standardizing business processes and reporting across our organization, management will continue to evaluate and monitor our internal controls as processes and procedures in each of the affected areas evolve.

TRIO-TECH INTERNATIONAL
PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Not applicable.

Item 1A. Risk Factors

Not applicable

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Malaysia and Singapore regulations prohibit the payment of dividends if the Company does not have sufficient retained earnings and tax credit. In addition, the payment of dividends can only be made after making deductions for income tax pursuant to the regulations. Furthermore, the cash movements from the Company's 55% owned Malaysian subsidiary to overseas are restricted and must be authorized by the Central Bank of Malaysia. California law also prohibits the payment of dividends if the Company does not have sufficient retained earnings or cannot meet certain asset to liability ratios.

Item 3. Defaults Upon Senior Securities
